

Is asset-design.jp legit? TrustSniffer's high-trust assessment: 100/100

asset-design.jp

Verdict

100

OUT OF 100

HIGH TRUST

asset-design.jp appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not ScamLow Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Japanese corporate site for Asset Design Laboratory (資産デザイン研究所). Describes company mission, services (seminars, overseas investment study tours, book publishing, corporate media/columns), news of upcoming events, and a newsletter sign-up. No login, no payment forms or explicit high-yield promises present in the captured text.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What asset-design.jp served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is the corporate site of Asset Design Laboratory, a Japan-based financial-education and publishing business that presents investment seminars, overseas investment study tours, books, newsletters, media production, and related corporate services. Its apparent business model is to generate revenue from events, publications, subscriptions, and corporate engagements rather than from an online trading or payment platform.

Scam/Impersonation Risk

No contradictions were observed. The captured pages contain no apparent phishing, brand-impersonation, credential-harvesting, login, or payment-flow indicators, and available external checks recorded no malicious findings, blacklist hit, or abuse reports. The site's investment-related material is presented as educational and promotional content; the evidence does not show cryptocurrency activity, unusually high-yield promises, or high-pressure transaction mechanics. The operator's real-world identity remains independently unverified, so the legitimacy assessment is evidence-consistent rather than proof of ownership.

EVIDENCE

- The homepage and service content identify a corporate financial-education site and show no login or payment form.
- Behavioral inspection recorded no external posts, no external XHR activity, no hidden forms, no wallet connection, and no cloaking.
- The domain was registered on 2012-11-20 and is approximately 13.76 years old.
- Historical records show site presence from 2013-01-04 through 2026-02-04, covering 14 years.

Regulatory Verification Notes

The company and about pages present the Japanese entity name 株式会社資産デザイン研究所 and identify 内藤忍 as representative director. The services pages describe asset-management seminars, overseas investment seminars and study tours, book publishing, newsletters, corporate publications, media columns, and speaker dispatch. These offerings create a legitimate-looking educational and consultancy profile, but the captured material does not provide a regulatory licence or registration number; that is a transparency and verification point, not evidence of fraud. No independent regulated-entity status was established, and the site's TLS and hosting indicators support technical continuity rather than legal authorization.

EVIDENCE

- The company/about pages identify “株式会社資産デザイン研究所” and list 内藤忍 as representative director.
- The services pages describe seminars, overseas investment study tours, publications, newsletters, and corporate media services.
- The site is served on AS7506, GMO-I-R1 - GMO Internet, Inc., JP.
- The site's TLS certificate is issued by YR1, uses DV validation, and is valid to 2026-10-02.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the company identity and the applicable status of any investment-advisory or financial-promotion activity through the relevant Japanese registry or regulator. Event fees, publication purchases, cancellation terms, refund arrangements, and payment-protection options should be confirmed from independently obtained contact details and written terms. Any representative or partnership claim should likewise be validated through an offline or independently sourced channel.

EVIDENCE

- The company page is the principal on-site source for the legal name and representative information.
- The captured content describes paid seminars and overseas investment study tours but does not provide a licence or registration number.
- The contact page supplies the site's stated contact route for confirming commercial arrangements.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate corporate website and supports a high-trust, low-risk posture. No scam, phishing, impersonation, or other contradictory signal was identified, although the operator's real-world identity has not been independently verified.

Infrastructure Integrity

The site resolves directly to one likely origin IP and has no detected CDN or WAF edge layer. This reduces the benefit of intermediary traffic filtering and origin shielding, but it is a technical architecture characteristic rather than an indication of maliciousness.

EVIDENCE

- Hosting infrastructure resolves to 157.7.189.67 in Japan on AS7506, GMO-I-R1 - GMO Internet, Inc., JP.
- No CDN was detected; the infrastructure record shows 1 unique IP, 0 edge IPs, and 1 likely origin IP.

Closing Assessment

Normal browsing is proportionate to the assessed posture; before submitting credentials or making payments, ordinary independent checks of merchant identity, applicable terms, refunds, and payment protections should be completed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of asset-design.jp.

- The request stayed on asset-design.jp. It was not redirected to another domain. CLEAR
- DNS for this domain is served by dnsv.jp, across 4 name servers. NOTED
- The registration is paid up to 2026-11-30. NOTED
- The earliest public archive of this site is from 2013-01-04. CLEAR
- It is hosted on GMO-I-R1, from a server in JP. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about asset-design.jp at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
