Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2019.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is a Portuguese informational and community website for Associação de Fuzileiros (AFZ), presenting association news, historical material, statutes, membership procedures, delegations, publications, veteran resources, and media content rather than a commercial or investment service.

Scam/Impersonation Risk

No contradictions were observed: the supplied evidence identifies no blacklist or phishing hit, brand impersonation, conflicting legal identity, or other confirmed fraud indicator. The homepage presents a coherent association-oriented purpose, with sections for statutes, governing bodies, membership, delegations, archives, newsletters, and reports of activities and accounts. It contains no login form, sensitive submission form, wallet connection, payment redirection, cloaking, or suspicious script behavior in the observed session. The site therefore appears consistent with an established, apparently legitimate association website, while the real-world operator identity remains independently unverified.

EVIDENCE

- The homepage identifies “Associação de Fuzileiros” and provides association news, historical resources, membership procedures, delegations, publications, and veteran information.
- Registration continuity indicates a domain age of 7.43 years.
- Web-archive records show 59 snapshots spanning 2019–2026, with 8 years tracked.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and 0 abuse reports; no impersonation or phishing indicator was identified on the observed pages.

Regulatory Verification Notes

The site's legal and governance content includes “Estatutos e Regulamentos,” “Titulares Órgãos Sociais,” “Organogramas,” and “Relatório de Actividades e Contas,” which are appropriate transparency materials for an association. No specific financial-services license is claimed or required by the site's apparent informational purpose; however, the supplied evidence does not independently verify the association's legal registration or operator identity. Any membership fee, donation, event payment, or shop activity should therefore be treated as an ordinary identity and payment-protection verification matter, not as evidence of fraud. The available technical, historical, content, and external-reputation signals are collectively consistent with an established site.

EVIDENCE

- The homepage links to statutes, regulations, office holders, organizational charts, and activity-and-accounts reporting.
- The site is served from AS62416, PTServidor - SAMPLING LINE-SERVICOS E INTERNET, LDA, PT.
- The site's TLS certificate is issued by YR2, uses Domain Validation (DV), and is valid to 2026-10-06.
- The site's transport encryption was confirmed as valid, and the observed page returned successfully with stable behavior across two successful runs.

What to Verify Next

Before credential or payment interactions, an organization intending to engage with the association should independently confirm the association's legal identity and the relevant membership, donation, event, or purchase terms through an official registry or an independently sourced contact channel. Payment protections, refund or cancellation provisions, and the authenticity of any restricted-area credentials should be checked before completing a transaction.

EVIDENCE

- The membership area provides a “Proposta de sócio” and “Como ser Sócio” process that can be compared with independently obtained association information.
- The site includes statutes, governing-body information, and activity-and-accounts material that can support an independent organizational-identity check.
- No sensitive form or untrusted form destination was observed on the analyzed homepage.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk association website. No scam, phishing, impersonation, or identity-conflict signal was observed, although the real-world operator identity is not independently verified.

Infrastructure Integrity

The site resolves directly to one likely origin address and has no detected CDN or WAF layer. This provides less intermediary shielding than a site using mainstream edge protection, but it is a neutral infrastructure characteristic here and does not contradict the otherwise positive assessment.

Closing Assessment

Normal informational use is proportionate; before submitting credentials or making payments, ordinary independent checks of organizational identity, applicable terms, and payment protections should be completed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of associacaofuzileiros-afz.pt.

- The request stayed on associacaofuzileiros-afz.pt. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2019-03-19. CLEAR
- It is hosted on PTServidor, from a server in PT. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about associacaofuzileiros-afz.pt at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
