

Is astapro.org.ar a scam? TrustSniffer's high-risk assessment: 0/100

astapro.org.ar

Verdict

0

OUT OF 100

CRITICAL RISK

astapro.org.ar shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

Informational page for As.Ta.Pro, a workshop association providing work activities for people with disabilities, listing activities, sales events, institutional role, foundation date and legal registration details.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What astapro.org.ar served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2007.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website presents AS.TA.PRO, the Asociación Taller Protegido de General Roca, as a local nonprofit workshop providing occupational activities for people with disabilities, including gardening, recycling, carpentry, food preparation, and textile production, with revenue from produced-goods sales and institutional support intended to fund operations and participant stipends.

Scam/Impersonation Risk

Confirmed external contradiction signals materially outweigh the benign appearance of the captured homepage. The site is associated with a confirmed blacklist entry, and external security checks produced multiple malicious and suspicious detections, including detections from Fortinet and Sophos. The page itself is informational, contains no login or sensitive-input form, and presents no observed brand-impersonation or identity-inconsistency signal; however, that benign page behavior does not neutralize the external threat findings. No suspicious contact-email anomaly was identified. The domain's historical continuity also does not establish that the currently served content is safe for sensitive interaction.

EVIDENCE

- The homepage is an informational organizational page with no login form, hidden form, password submission, wallet interaction, or sensitive form detected.
- External reputation checks recorded 12 malicious detections and 2 suspicious detections; Fortinet and Sophos were among the flagged providers.
- The domain was registered in 2007 and is approximately 19.18 years old, based on registration-continuity evidence.

Regulatory Verification Notes

The institutional page describes AS.TA.PRO's organizational role, activities, foundation information, and legal registration details, but the supplied content does not claim a regulated financial license or provide a license number. Independent identity verification remains incomplete, and governance and ownership disclosures are therefore not sufficient to establish the real-world operator for sensitive engagement. The page's nonprofit presentation and lack of financial-service mechanics are relevant context, but they do not override the confirmed external reputation issue. No matching broker-reputation record was identified; this is contextual only and is not a licensing determination.

EVIDENCE

- The homepage identifies "AS.TA.PRO – Asociación Taller Protegido de General Roca" and describes its institutional structure and nonprofit workshop activities.
- No regulated license or license number is claimed in the supplied site content.
- The site uses a valid DV TLS certificate issued by WE1, valid through 2026-11-12.

What to Verify Next

Before any sensitive interaction, an independent party should confirm that the organization named on the institutional page is the lawful operator of the domain through the applicable organizational or governmental registry. Any proposed payment, donation, or account process should be validated through independently sourced contact and payment channels rather than links or instructions presented solely by the website. Security teams should also obtain a current, independent endpoint assessment before allowing the domain in credentialed or financial workflows.

EVIDENCE

- The site's identity-verification status is unverified despite its institutional presentation.
- The available regulatory context does not identify a verifying authority or confirmed license.
- The external assessment recorded a confirmed blacklist condition and malicious detections, requiring independent technical validation before sensitive use.

Summary Verdict

The overall posture is **critical trust risk**, with a clear risk of sensitive-interaction exposure. The website may depict a genuine nonprofit organization, but the available evidence does not establish that the currently served domain is safe or that its operator has been independently verified.

Infrastructure Integrity

The site is served through Cloudflare’s CDN/WAF, which is a mitigating control against direct exposure of the hosting environment but is not evidence of legitimacy. All observed addresses were CDN edge infrastructure, and the origin server was not observable in this analysis.

EVIDENCE

- Hosted on AS13335, CLOUDFLARENET – Cloudflare, Inc., US.
- Four observed IP addresses were identified as Cloudflare CDN edge addresses; zero likely origin candidates were identified.

Closing Assessment

Prospective users should restrict activity to passive viewing and should not log in, submit credentials, or conduct financial transactions through the site unless the organization, domain control, and intended transaction path have been independently validated.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of astapro.org.ar.

- The request stayed on astapro.org.ar. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2007-06-13. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about astapro.org.ar at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
