- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is the online storefront of Atacadão Móveis Chapecó, a Brazilian furniture and home-goods retailer presenting an extensive product catalogue, promotional pricing, customer-account facilities, nationwide delivery, and support for online and physical-store purchases.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or deceptive financial propositions were observed. The homepage presents a coherent retail model covering furniture, mattresses, upholstery, appliances, and related household goods, with payment by card or Pix. Its product structure, ordering functions, delivery proposition, return information, physical retail presence, and legal-entity references converge with the profile of an established commercial retailer rather than an imitation or fraudulent storefront.

- The homepage advertises card instalments of up to 12 interest-free payments, Pix pricing, nationwide delivery, order tracking, and customer registration.
- The domain was registered on 12 March 2018 and is approximately 8.39 years old; the registration identifies ATACADAO MOVEIS CHAPECO as the owner and runs through 12 March 2027.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing finding, no abuse reports, and no matching threat signatures.
- Behavioral examination found no cloaking, hidden forms, external password forms, suspicious inline scripts, clipboard hijacking, or cryptocurrency-wallet activity.

Regulatory Verification Notes

The homepage provides CNPJ identifiers, store addresses, contact information, customer-service material, and published policy and return information, giving the business a substantive on-page identity. The available evidence does not establish a regulated financial or brokerage activity: the site presents conventional retail sales, and no third-party broker record was matched. Accordingly, the absence of a financial-services licence claim is not an adverse indicator for the business model shown.

- The homepage identifies three physical locations in Chapecó and provides CNPJ references alongside customer-service and policy information.
- The page categorizes the operation as a furniture and home-goods ecommerce storefront rather than an investment, brokerage, or cryptocurrency service.
- The site is served from AS16509 (AMAZON-02 — Amazon.com, Inc., US).

- The site's transport encryption uses a YR1-issued domain-validated TLS certificate, valid until 5 October 2026.

What to Verify Next

For material purchases, standard commercial due diligence should confirm that the CNPJ shown during checkout corresponds to the invoicing entity, that the selected delivery terms cover the destination and item type, and that return or warranty conditions are retained with the order record. Prospective customers may also confirm the relevant store and customer-service channel independently before arranging collection or making an unusually large payment.

- The homepage offers both online fulfilment and assistance associated with physical stores, making the chosen seller and fulfilment route relevant to the transaction record.
- The storefront states that delivery is available throughout Brazil, while individual product and destination conditions may govern actual fulfilment.
- Published return information provides a basis for comparing the terms displayed before purchase with the final order documentation.

Summary Verdict

The website is a legitimate, established, and trustworthy retail operation. Its commercial identity, coherent storefront content, mature domain presence, clean threat reputation, and benign observed behavior support normal interaction, including account login, order management, and standard purchases.

Infrastructure Integrity

The website uses AWS-based CDN/WAF protection, with the observed address operating as an Amazon edge endpoint. No origin-server candidate was exposed during the assessment; this reduces direct infrastructure exposure but is treated as a security mitigation rather than independent proof of business legitimacy.

Closing Assessment

Normal use is appropriate, with routine purchase due diligence proportionate to the value, delivery method, and warranty implications of the transaction.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about atacadaomoveischapeco.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
