Full analysis

Overview

Atacadão Pneus is a Brazilian online tire retailer that presents a broad catalogue of tires and related products for consumers and resellers, supported by delivery, installment payments, reviews, customer service, and ordinary account functionality.

Scam/Impersonation Risk

No contradictions were observed. The site's physical-goods retail model is coherent with its catalogue, purchasing functions, payment information, policies, and customer-service content. External checks found no malicious or suspicious detections, no phishing indication, and no evidence of brand impersonation. Its long-established registration and sustained historical continuity further support a genuine operating identity.

- Domain registered 2008-05-27 (~18.19 years old).
- Web archive records 168 snapshots from 2011-10-27 through 2025-12-02, spanning 15 tracked years.
- The homepage presents tire products, pricing, payment options, delivery information, reviews, and reseller services consistent with an established ecommerce operation.

Regulatory Verification Notes

The site presents a CNPJ, contact details, payment information, privacy material, and returns policies, providing substantive commercial identity and consumer-information content. No regulated-financial licence claim or licence number is identified in the supplied material; for this retail business model, that is a transparency item rather than evidence of deception. The external reputational context is clean, and no broker-related match was identified.

- Hosted on AS266444 (3L CLOUD INTERNET SERVICES LTDA - EPP, BR).
- TLS certificate issued by YE1, validation level DV, valid to 2026-10-14T18:56:57+00:00.
- The site's homepage and policy content provide commercial, payment, privacy, and returns information.

What to Verify Next

For material purchases, confirm the CNPJ through the applicable Brazilian corporate registry and ensure the terms, delivery, returns, and payment conditions match the transaction presented at checkout. Independent confirmation of the published support channels is also appropriate for high-value orders.

- The terms and returns pages are the relevant records for confirming purchase conditions.

- The account, order, payment, and support functions provide the appropriate points for transaction-level consistency checks.

Summary Verdict

The site presents as a legitimate, established, and trustworthy ecommerce business with a coherent operating model and no observed scam or impersonation indicators. Normal interaction, including account login, account actions, and standard purchasing, is appropriate.

Infrastructure Integrity

The site resolves to a single apparent hosting address on AS266444, operated by 3L CLOUD INTERNET SERVICES LTDA - EPP in Brazil, with no CDN or WAF identified. This is a straightforward hosting posture with less edge-layer protection than CDN-backed delivery, but it does not undermine the site's established identity or trust assessment.

Closing Assessment

Prospective users may proceed with normal account use and standard transactions, applying ordinary payment and order controls appropriate to the value of the purchase.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about atacadaopneus.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
