

Is atciq.net legit? TrustSniffer's high-trust assessment: 90/100

atciq.net

Verdict

90

OUT OF 100

HIGH TRUST

atciq.net appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 70%.

What this site appears to be

Corporate website for ALTAMEER TECHNOLOGY Co., an Iraqi contracting and trading company offering civil, mechanical, electrical, cleaning and supply services, with mission/vision statements and contact details.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website presents itself as ALTAMEER TECHNOLOGY Co. (شركة تكنولوجيا التعمير للتجارة والمقاولات والخدمات العامة), an Iraqi corporate contractor and general trading company. Its content describes civil, mechanical, electrical, cleaning, facilities, and supply services delivered through contracting and service agreements with public and private clients, supported by company, mission, vision, and contact information.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent corporate-services model rather than an investment, cryptocurrency, gambling, or credential-harvesting operation; the reviewed pages contain no login form, sensitive submission form, wallet connection, or obvious phishing mechanism. Available external reputation checks recorded no malicious or suspicious detections, and the site's historical record shows sustained continuity rather than suspicious repurposing. Limited suspicious inline scripting and synthetic page responses were observed during technical interaction, but these findings were not accompanied by external network activity, hidden forms, password collection, wallet-drainer behavior, or brand-impersonation indicators; they therefore represent minor technical anomalies rather than evidence of scam activity.

EVIDENCE

- Domain registration: 2017-11-05; age 8.8 years.
- Web archive: 253 snapshots from 2018-06-23 through 2026-02-06, spanning 9 years tracked.
- The homepage and corporate-content pages identify ALTAMEER TECHNOLOGY Co. and describe construction, trading, and service activities without financial-solicitation or phishing features.
- Browser inspection recorded 2 suspicious inline scripts, 0 external XHR/fetch requests, 0 hidden forms, and 0 wallet-drainer runs.

Regulatory Verification Notes

The company's stated identity and business activities are presented through its corporate and services content, but the available material does not independently establish the real-world operator or provide a verified licensing or registration reference. The absence of a license claim or number is therefore a regulatory-disclosure gap requiring ordinary commercial verification, not evidence of impersonation or fraud. The site otherwise has a conventional business profile, sustained domain history, and technically valid transport encryption; these signals support an apparently established presentation while remaining separate from proof of legal authorization.

EVIDENCE

- The site's title and corporate pages identify "ALTAMEER TECHNOLOGY Co." and describe civil, mechanical, electrical, cleaning, and supply services.
- Domain registration lists Name.com, Inc. as registrar.
- Hosting is served from AS32475 (SINGLEHOP-LLC - Internap Holding LLC, US).
- TLS certificate: issuer YR2, validation level DV, valid to 2026-09-27T13:57:31+00:00.

What to Verify Next

Before credential or payment interactions, an interested counterparty should independently confirm the company's legal name, contracting authority, and current commercial registration through the relevant Iraqi corporate or contracting registry. Contract documents should identify the same counterparty and payment beneficiary, while return, cancellation, invoice, and dispute terms should be confirmed through an independently obtained business channel rather than relying solely on the website. Independent confirmation of the published contact routes is also appropriate for material transactions.

EVIDENCE

- The About, mission, and vision content supplies a defined corporate context against which registry records and contract documentation can be compared.
- The services content identifies a business-to-business contracting and supply model, making counterparty and beneficiary matching the relevant transaction control.
- The contact page provides the website's stated communication route for independent confirmation.

Summary Verdict

Available evidence supports a **high-trust, low-risk posture** consistent with an established, apparently legitimate corporate website. The conclusion is supported by coherent business content, sustained historical

continuity, clean available reputation signals, and stable technical operation, while the operator's real-world identity remains independently unverified.

Infrastructure Integrity

The site resolves to infrastructure operated by SINGLEHOP-LLC / Internap Holding LLC in the United States under AS32475, with two likely origin IPs and no detected CDN or WAF layer. This is a straightforward hosting posture rather than an observed concealment mechanism; the valid TLS deployment provides the principal transport-security control.

Closing Assessment

Standard business engagement is proportionate to the assessed posture, subject to the ordinary independent counterparty, payment-protection, and commercial-document checks expected for any unfamiliar supplier.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of atciq.net.

- The request stayed on atciq.net. It was not redirected to another domain. CLEAR
- Registration is published under Name.com, Inc.. CLEAR
- DNS for this domain is served by superdomainzone.com, across 2 name servers. NOTED
- The registration is paid up to 2026-11-05. NOTED
- The earliest public archive of this site is from 2018-06-23. CLEAR
- It is hosted on SINGLEHOP-LLC, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about atciq.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
