Full analysis

Overview

This website presents itself as the Jefatura de Derechos del Personal del Ejército, an institutional public-service department providing information on military personnel rights, benefits, procedures, organizational responsibilities, and contact channels. Its apparent purpose is informational and administrative rather than commercial, with no visible financial solicitation or payment service.

Scam/Impersonation Risk

The site's presentation is consistent with an official-looking military or government information page, and the supplied page analysis found no login form, payment flow, credential request, or brand-impersonation indicator. However, this benign content is materially outweighed by confirmed external threat detections: the domain is recorded on blacklist sources, with two malicious and one suspicious detection. This is a direct contradiction to the site's institutional presentation and supports a clearly cautionary posture for sensitive interactions. No conflicting legal-entity names were observed, and no page-level phishing indicators were identified, but those absences do not resolve the confirmed blacklist finding.

EVIDENCE

- The homepage identifies the “Jefatura de Derechos del Personal del Ejército,” describes military rights and benefits, and names organizational leaders.
- External reputation telemetry records 2 malicious detections, 1 suspicious detection, and a confirmed blacklist status.
- Domain registration continuity records creation on 2016-07-21, with an age of 10.08 years; archival records span 2017-06-05 through 2026-06-10, covering 10 years.

Regulatory Verification Notes

The homepage provides an institutional name, mission statement, organizational structure, and named officials, but the real-world operator's connection to that institution is not independently verified. No licensing or registration number is presented; for a page describing public administrative functions rather than a financial service, this is a transparency item requiring confirmation of institutional affiliation rather than evidence of financial misconduct. The site's valid transport encryption and identifiable hosting infrastructure are positive technical characteristics, but they do not validate the claimed government identity or offset the external reputation concern.

EVIDENCE

- The homepage names Crl Art. Riveros Aleman Edson Humberto as head of the department and describes responsibilities for military and civilian personnel benefits.
- The homepage presents “Consulta tu trámite,” “Cartilla de Procedimientos,” “Contáctanos,” and “Preguntas Frecuentes” functions, but no license or registration number is shown.
- Hosted on AS47583 (AS-HOSTINGER – Hostinger International Limited, CY), with network country UA.
- TLS certificate issued by YE2 at DV validation level, valid to 2026-10-19.

What to Verify Next

Institutional affiliation should be confirmed through an independently obtained official government or military directory, rather than relying solely on contact details published on the site. Any proposed account, credential, document submission, or financial action should remain suspended until the official domain and contact channels are corroborated through an offline or independently sourced route. The department name and named officials should be matched against authoritative public records, and any procedure should be initiated only through a verified official channel.

EVIDENCE

- The homepage provides the department name, mission, organizational leaders, rights-and-benefits descriptions, and procedural navigation suitable for comparison with independent institutional records.
- The site's visible navigation includes “Contáctanos” and “Consulta tu trámite,” providing specific channels whose authenticity can be checked independently.
- The observed page contained no sensitive form or external payment destination, so any later request for such information would represent a material change in interaction risk.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The site has a plausible informational presentation, but the confirmed external contradiction is more consequential than its page content and technical availability. The operator’s real-world identity remains unverified.

Infrastructure Integrity

The site resolves through Hostinger infrastructure on AS47583, with four likely origin addresses and no detected CDN or WAF edge layer. This provides identifiable hosting and some technical transparency, but the absence of an intermediary protection layer offers no basis for treating the site as institutionally authentic.

Closing Assessment

Prospective users should restrict activity to passive review until the blacklist finding and institutional affiliation have been independently resolved, and should not submit credentials, use account-login functions, or conduct financial transactions in the interim.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about atencionalpublicojdpe.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
