

Is athensems.gr a scam? TrustSniffer's high-risk assessment: 5/100

athensems.gr

Verdict

5

OUT OF 100

CRITICAL RISK

athensems.gr shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 75%.

What this site appears to be

Local Athens-based EMS and personal training service site offering EMS/body sculpt and personal training with contact phone and email for booking. Content in Greek and English, includes cookie consent and social links.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Athens EMS & Personal Training is a local fitness-services website presenting EMS training, body-sculpting and personal-training offerings, with booking and contact functionality intended to generate paid appointments.

Scam/Impersonation Risk

The site's visible content presents a coherent local-services model and does not show brand impersonation, a login form, credential collection, or a sensitive payment form. However, this benign presentation is materially outweighed by external threat intelligence recording malicious detections and a confirmed **blacklist** presence from multiple sources. The domain also has substantial historical continuity and no identified suspicious repurposing, which supports the existence of an established web presence but does not neutralize the current reputation conflict. Sensitive interaction should therefore be treated as high risk until the external findings are independently resolved.

EVIDENCE

- The homepage contains one contact form and no detected login or password-submission form.
- External reputation evaluation recorded 9 malicious and 1 suspicious detections, with blacklist status confirmed by 2 external sources.
- The domain was registered in 2018 and is approximately 7.91 years old; its historical record shows 614 archive snapshots spanning 2018-09-22 through 2026-06-10, covering 9 tracked years.

Regulatory Verification Notes

The apparent business identity is a local Athens fitness provider, and three social profiles are linked from the site, but the real-world operator is not independently verified. No licensing authority or license number is claimed in the available business information, leaving the legal and regulatory position unclear; this is a verification gap rather than, by itself, proof of fraud. The transport layer is technically valid, but domain-validation TLS confirms control of the domain rather than the legal identity or regulatory standing of the operator.

EVIDENCE

- The site title identifies “Athens EMS & Personal Training,” and the content is presented in Greek and English as a local fitness-services offering.
- Hosting is identified as AS24940, HETZNER-AS - Hetzner Online GmbH, DE.
- The TLS certificate uses issuer YR1, has DV validation, and is valid to 2026-10-13 18:49:09 UTC.
- No license authority or license number is identified in the available business-model disclosures.

What to Verify Next

Before any sensitive interaction, an independent party should confirm the operator’s legal name, physical business presence, and booking relationship through an offline or independently sourced channel. Any applicable Greek business, health, or fitness-service registration should be checked directly with the relevant official registry. Payment arrangements should use a method offering dispute and chargeback protection, and any account or payment request should be assessed against the independently confirmed operator details.

EVIDENCE

- The available identity signal connects the site to a likely real-world entity but does not establish verified operator identity.
- The site’s stated business model involves paid appointments and contact-based bookings.
- The available regulatory disclosure state is unclear and contains no identified license reference.

Summary Verdict

The overall posture is **critical trust risk**. Although the website has a coherent service presentation and established historical continuity, the confirmed external blacklist and malicious detections create a decisive contradiction that makes the site unsuitable for sensitive interaction without independent resolution.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, and the observed address view consists of an edge server rather than an independently observable origin. This provides a mitigating layer against direct exposure but does not establish legitimacy and can limit independent verification of the underlying hosting environment.

EVIDENCE

- Cloudflare CDN/WAF protection was detected.
- One observed edge address was recorded, with no likely origin candidate identified.
- The observed edge address is 37.27.53.114.

Closing Assessment

Sensitive actions should be withheld pending independent confirmation of the operator and resolution of the external reputation findings; if interaction is unavoidable, it should remain limited to non-sensitive review through independently validated channels.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine, behaviour in a sandbox, external reputation.

01 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of athensems.gr.

- The request stayed on athensems.gr. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2018-09-22. CLEAR
- It is hosted on HETZNER-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about athensems.gr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
