

Is atlasfence.com legit? TrustSniffer's high-trust assessment: 80/100

atlasfence.com

Verdict

80

OUT OF 100

HIGH TRUST

atlasfence.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 70%.

What this site appears to be

Atlas Fence - Syracuse-area fencing company site providing address, phone, service descriptions, project highlights, testimonials, and a contact/free-estimate form.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2000.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Atlas Fence is a Syracuse-area fencing contractor website presenting residential and commercial fence installation, repair, gates, product options, project highlights, testimonials, and a free-estimate contact form. Its apparent business model is to generate service inquiries and contract for fencing work and related materials.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent local-service model, including an East Syracuse address, telephone number, fencing categories, project-related content, testimonials, and a free-estimate form; it does not present a login flow, cryptocurrency features, investment returns, or other high-risk financial mechanics. Available external checks found no malicious or suspicious detections, no phishing or impersonation indicators, and no broker-dataset match. These signals are consistent with an established, apparently legitimate local-business website, although they do not independently prove the real-world operator's identity.

EVIDENCE

- Homepage: The site identifies itself as Atlas Fence and presents the title “Syracuse Fence Company & Installation Contractor | Repair Services | Atlas Fence,” together with an East Syracuse address and telephone number.
- Homepage and contact interface: The only detected form is a contact/free-estimate form; no login form, hidden form, password collection, wallet connection, or wallet-drainer behavior was detected.
- Domain registration and archive history: Registered 1998 (~28.54 years old); 259 archive snapshots spanning 2000–2026 (27 years tracked).
- External reputation checks: No malicious or suspicious detections, no external blacklist result, and zero reported abuse records were recorded in the available checks.

Regulatory Verification Notes

The website's content is consistent with a conventional fencing contractor rather than a financial or otherwise clearly regulated service. Its About, History & Mission, Testimonials, Community, Careers, and Contact areas provide business-context material, while the site does not make a licensing claim or display a license number in the supplied pages. That is a disclosure point for ordinary contractor due diligence, not evidence of fraud. The operator's real-world identity remains independently unverified, so the on-site Atlas Fence presentation should be treated as apparently legitimate rather than identity-proven. Domain registration through GoDaddy.com, LLC and valid transport encryption provide supporting infrastructure and continuity signals.

EVIDENCE

- Domain registration: Registrar recorded as GoDaddy.com, LLC; creation date 1998-02-11T05:00:00Z and expiration date 2027-02-10T05:00:00Z.
- Hosting telemetry: Served from AS23535 (HOSTROCKET - HostRocket.com, Inc., US).
- Transport encryption: TLS certificate issued by Starfield Secure Certificate Authority - G2, validation level DV, valid to 2027-02-25.
- Business pages: The supplied site content includes About, History & Mission, Testimonials, Community, Careers, and Contact sections, but no displayed license authority or license number.

What to Verify Next

Before credential or payment interactions, independently confirm that the published business identity corresponds to the intended contractor, obtain a written estimate identifying the contracting party and payment terms, and review applicable return, cancellation, warranty, and workmanship provisions. Where local rules require contractor registration or licensing, confirm the status directly with the relevant public registry. Payment arrangements should preserve ordinary consumer or commercial payment protections, and contact channels should be confirmed through an independent route where the transaction is material.

EVIDENCE

- The site's business purpose is explicitly described as residential and commercial fencing installation and repair, making contractor-identity and workmanship checks the relevant next diligence.
- The site provides a free-estimate workflow requesting name, email, and telephone details, which supports an inquiry process rather than an account-based service.
- The available page analysis classified the site as a local business/service and identified no content red flags.

Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence consistent with an established, apparently legitimate website. No scam, phishing, impersonation, or identity-conflict indicators were observed, but the operator connection is not independently verified; the site therefore supports normal prospective engagement subject to ordinary business and payment checks.

Infrastructure Integrity

The site resolves to a single US hosting origin on HostRocket rather than through a detected CDN or WAF edge network. This conventional hosting arrangement does not itself indicate maliciousness; the identified provider, stable resolution, and valid certificate are mitigating technical signals, not proof of the operator's identity.

EVIDENCE

- Network resolution: One unique IP and one likely origin IP were identified; no CDN edge IPs or detected CDN vendors were present.
- Hosting: AS23535 is registered through ARIN, with the hosting country recorded as the US.
- Transport security: The site's certificate is DV-validated and remains valid through 2027-02-25.

Closing Assessment

The site is suitable for ordinary service research and engagement, provided that material commitments use independently confirmed business details, written contractual terms, and payment methods with appropriate protection.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of atlasfence.com.

- The request stayed on atlasfence.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2027-02-10. NOTED
- The earliest public archive of this site is from 2000-04-07. CLEAR
- It is hosted on HOSTROCKET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about atlasfence.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
