Full analysis

Overview

Atmaeco is a commercial publishing and ecommerce website presenting aromatherapy ebooks and curated wellbeing product boxes, with quote-request calls to action for prospective customers.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, impersonation, blacklist, or malicious-content indicators. The homepage presents a coherent retail and publishing model rather than investment, credential-harvesting, or cryptocurrency activity; its products are described as aromatherapy ebook collections and related product boxes, with “Solicitar Orçamento” as the primary commercial action. This supports an apparently legitimate, low-risk presentation, while the available evidence does not independently prove the real-world operator’s identity.

EVIDENCE

- Homepage content describes Atmaeco as a publisher offering aromatherapy ebook collections and product boxes, with quote-request calls to action.
- Homepage analysis identified no login form, sensitive form, wallet connection, or financial-investment mechanism.
- Available external reputation checks found no malicious, phishing, or blacklist indicators.
- Domain registration record: registered 2018-06-05, approximately 8.21 years old.
- Web-archive records span 2021-11-26 through 2025-07-11, covering 5 tracked years.

Regulatory Verification Notes

The homepage provides a CNPJ, telephone number, business hours, and a commercial contact channel, which is a useful on-page disclosure for a small retail publisher. The site does not present a regulated-finance license, and its stated activity is the sale of informational and wellbeing products rather than financial services; this is therefore a transparency and applicability point for ordinary business verification, not evidence of deception. Some product descriptions state that aromatherapy materials address skin, infectious, respiratory, emotional, and pain-related conditions, so applicable consumer-protection and health-claim requirements should be considered before relying on those statements. The apparently established presentation is supported by the domain's sustained registration, valid transport encryption, and identifiable hosting, but the operator's real-world identity remains independently unverified. A third-party broker-reputation dataset produced no match; that is contextual support only and not a licensing determination.

EVIDENCE

- Homepage displays a CNPJ, telephone number, weekday operating hours, and commercial contact information.
- Domain registration record shows creation on 2018-06-05 and expiration on 2027-06-05.
- The site is served from AS53038, IDC19 SOLUCOES EM TECNOLOGIA DA INFORMACAO LTDA, Brazil.
- TLS certificate is issued by YR1 at DV validation level and is valid until 2026-10-28 17:00:02 UTC.

What to Verify Next

Before credential or payment interactions, independently confirm the merchant identity associated with the business registration presented on the homepage and ensure that invoices, refund terms, delivery conditions, and payment-protection options are clearly documented. Any health-related product claims should be assessed against applicable Brazilian consumer and advertising requirements. Contact channels should also be confirmed through an independent route before a high-value order or disclosure of sensitive information.

EVIDENCE

- The homepage uses a request-quote workflow rather than displaying a conventional sensitive-data checkout form.
- The homepage provides business hours and a telephone channel that can be used for independent confirmation of commercial terms.
- The site's observed content is commercial and informational, with no stated financial-services licensing claim.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. The classification is not an independent verification of the real-world operator, so the site should be regarded as credible on the evidence available without treating its identity as conclusively proven.

Infrastructure Integrity

The site resolves to one likely origin address, with no CDN detected and no edge-IP layer identified. This is a conventional hosting posture rather than a contradiction, and the identifiable hosting environment provides a reasonable infrastructure context while remaining only a mitigating technical signal, not proof of legitimacy.

Closing Assessment

Ordinary browsing is proportionate to the available evidence; before submitting credentials or payment information, independent merchant-identity, transaction-policy, and payment-protection checks should be completed.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about atmaeco.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
