

Is atopmx.com a scam? TrustSniffer's high-risk assessment: 5/100

atopmx.com

Verdict

5

OUT OF 100

CRITICAL RISK

atopmx.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 55%.

What this site appears to be

Spanish-language website for ATOP (Aislamientos Térmicos de Occidente y del Pacifico). Lists services (advice, installation, maintenance, cleaning) with 25 years experience, contact phone and email, addresses for matrix and branch, and a contact/booking form for requesting quotes or scheduling service.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What atopmx.com served when TrustSniffer captured it on 2026-08-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website is a Spanish-language local business site for ATOP (Aislamientos Térmicos de Occidente y del Pacifico), presenting thermal-insulation consulting, mounting, installation, maintenance, and cleaning services for industrial and commercial customers. It promotes approximately 25 years of experience, identifies Guadalajara-related business locations, and uses a quotation or service-booking form as its primary commercial mechanism.

Scam/Impersonation Risk

No conflicting legal-entity names or on-page brand-impersonation indicators were observed. However, the site is subject to a materially adverse external reputation signal: multiple external detections classify the domain as malicious or suspicious, and the domain has a confirmed blacklist status. This contradiction outweighs the otherwise ordinary local-service presentation and means the site should not be treated as safe for credentials, payment information, or other sensitive interactions. The website's content itself describes conventional insulation services, contains no login form, and shows no wallet, investment, or credential-harvesting behavior; these observations do not neutralize the external threat findings.

EVIDENCE

- The homepage presents ATOP as a thermal-insulation contractor offering advice, mounting, installation, maintenance, and cleaning services.
- The site's contact and booking form is identified as a service-request form rather than a password or payment form.
- External reputation telemetry recorded 5 malicious detections, 2 suspicious detections, and a confirmed blacklist status.
- Domain registration records show creation on 2019-05-18 and an age of 7.27 years; archival coverage is sparse, with records spanning 2021-03-01 to 2025-07-10 across 5 years of tracking.

Regulatory Verification Notes

The available site content identifies ATOP and supplies business contact and location information, but the real-world operator remains independently unverified. No license, registration number, or regulatory authority is claimed on the reviewed pages, so the site does not provide a basis for confirming any regulated status; this is a disclosure gap rather than, by itself, proof of fraud. The available third-party broker dataset produced no match, which provides limited contextual information and is not a legal or licensing determination. Ownership and governance details are insufficiently established for a high-confidence institutional engagement decision.

EVIDENCE

- The “Somos” and homepage content names “Aislamientos Térmicos de Occidente y del Pacifico” and describes claimed experience and industrial customers.
- The contact page and homepage provide a telephone contact, email contact, business addresses, and a request-for-quotation or scheduling form.
- The site does not claim a license, registration number, or supervising regulatory authority in the reviewed business information.
- Hosted on AS31898, identified as ORACLE-BMC-31898 / Oracle Corporation, US; the site uses a DV TLS certificate issued by YR1, valid to 2026-09-20T04:11:52+00:00.

What to Verify Next

Before any sensitive interaction, independently confirm that the business name, telephone number, addresses, and claimed customer references correspond to a genuine operating company. Any applicable Mexican corporate, tax, contracting, or industry credentials should be checked directly with the relevant official registry or counterparty rather than relying on the website. Contact channels should also be confirmed through an independent offline route, and quotation or service arrangements should use payment protections and documented contractual terms.

EVIDENCE

- The homepage claims approximately 25 years of insulation experience and references Cervecería del Pacifico, Grupo Lala, Tequila Cazadores, Coca-Cola del Pacifico, Laboratorios PISA, and the Instituto Mexicano del Seguro Social.
- The site identifies matrix and branch locations but does not independently substantiate those commercial references within the reviewed content.
- The sole form is intended for service quotation or scheduling and is not identified as a sensitive credential form.

Summary Verdict

The website presents a coherent local-service business model and contains no apparent on-page fraud mechanics, but the confirmed external blacklist status and malicious detections create a critical sensitive-interaction risk. The operator's identity is not independently verified, and the positive appearance of the pages is insufficient to overcome the adverse reputation evidence.

Infrastructure Integrity

The domain resolves directly to a single likely origin address hosted by Oracle Corporation in the United States under AS31898, with no detected CDN or WAF layer. Transport encryption is provided through a valid DV certificate issued by YR1; this protects the connection in transit but does not establish the legitimacy of the operator or mitigate the external reputation findings.

Closing Assessment

The appropriate posture is read-only review pending independent business validation; credentials, payment details, and other sensitive information should not be submitted until that validation is complete.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of atopmx.com.

- The request stayed on atopmx.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under Neubox Internet S.A. de C.V.. [CLEAR](#)
- DNS for this domain is served by hdpUBLICIDAD.mx, across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-05-18. [NOTED](#)
- The earliest public archive of this site is from 2021-03-01. [CLEAR](#)
- It is hosted on ORACLE-BMC-31898, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about atopmx.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
