

Is atplink.com a scam? TrustSniffer's high-risk assessment: 5/100

atplink.com

Verdict

5

OUT OF 100

CRITICAL RISK

atplink.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Vietnamese landing page for ATP Link, a free bio-link/bio-page builder by ATP Software. Describes features (templates, analytics, drag-and-drop), usage steps, and includes company contact and tax information. No obvious financial investment or credential-harvesting behavior present in the provided content.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://atplink.com/>

What atplink.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2001.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website is a Vietnamese-language landing page for ATP Link, a free bio-link and bio-page creation service operated in connection with ATP Software. It presents templates, customizable layouts, drag-and-drop creation, unlimited links, visitor analytics, and a short registration workflow for users directing audiences from social-media profiles to additional online destinations.

Scam/Impersonation Risk

The site itself presents as a conventional SaaS landing page and the supplied page review found no visible credential-harvesting form, financial-investment offer, wallet interaction, or obvious brand-impersonation element. That benign presentation is outweighed by external threat intelligence identifying the domain as blacklisted, with multiple malicious detections and an additional suspicious classification. The result is a material contradiction between the page content and the domain's external reputation, creating a high level of concern for login, credential, or other sensitive interaction. No page-level phishing or impersonation indicators were observed, but that absence does not resolve the confirmed reputation issue.

EVIDENCE

- The homepage describes ATP Link as a free bio-link and bio-page service and contains no sensitive form in the observed page capture.
- Behavioral inspection recorded no hidden forms, external password forms, wallet-provider detection, clipboard hijacking, or wallet-drainer activity.
- External reputation assessment recorded a confirmed blacklist condition and multiple malicious detections for the domain.

Regulatory Verification Notes

The available identity evidence connects the service presentation with ATP Software and indicates company contact and tax information on the landing page, but the real-world operator remains independently unverified. The service is presented as a software tool rather than a regulated financial product, and no license or regulatory registration number is claimed in the supplied content. That is a disclosure and verification matter, not by itself proof of misconduct; however, it should be considered alongside the confirmed blacklist signal. The domain's registration and transport-security records provide technical continuity, but they do not establish that the website is safe or that the operator is authorized for any particular activity.

EVIDENCE

- WHOIS records show registration on 2021-03-18 through INET CORPORATION, with an age of 5.43 years and expiry on 2027-03-18.
- The homepage identifies ATP Link as a product associated with ATP Software and includes company contact and tax information.
- TLS uses issuer YR2 with DV validation and is valid to 2026-10-06T18:06:39+00:00.

What to Verify Next

Before any sensitive use, the service's operator should be independently confirmed through an authoritative company registry and an offline or independently sourced contact route. Any claimed legal, data-protection, or service authorization should be matched to the relevant official registry, and account activity should not proceed until the domain-reputation issue has been resolved by the responsible security or risk team. If use is operationally necessary, initial testing should be limited to non-sensitive, non-production content without credentials, confidential information, or payment data.

EVIDENCE

- The site's identity is supported by on-page company information but is not independently verified.
- The supplied regulatory assessment records no claimed license authority or license number.
- The site's page content is a SaaS product landing page with a registration flow, while the domain carries confirmed external reputation warnings.

Summary Verdict

The website has a **critical trust posture** for sensitive interaction. Its ordinary SaaS presentation does not overcome the confirmed external reputation contradiction, and the available evidence is insufficient to support

account, credential, confidential-data, or financial use.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, which provides a mitigating layer against direct exposure but is not evidence of legitimacy. The observed edge infrastructure is associated with AS45899, VNPT-AS-VN – VNPT Corp, VN, and the supplied infrastructure assessment identified both CDN edge servers and potential origin candidates.

EVIDENCE

- Hosted on AS45899, VNPT-AS-VN – VNPT Corp, VN, in Vietnam.
- Cloudflare is detected as the CDN/WAF provider, with 1 observed edge IP and 2 potential origin candidates.
- The observed edge IP is 123.30.234.196.

Closing Assessment

The appropriate enterprise disposition is to suspend sensitive interaction and require independent identity, authorization, and reputation review before any production adoption. Any interim assessment should remain limited to non-sensitive observation or controlled testing.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine, external reputation.

01 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of atplink.com.

- The request stayed on atplink.com. It was not redirected to another domain. CLEAR
- Registration is published under INET CORPORATION. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-03-18. NOTED
- The earliest public archive of this site is from 2001-04-18. CLEAR
- It is hosted on VNPT-AS-VN, from a server in VN. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about atplink.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
