

Is atpress.ne.jp legit? TrustSniffer's high-trust assessment: 90/100

atpress.ne.jp

Verdict

90

OUT OF 100

HIGH TRUST

atpress.ne.jp appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not ScamLow Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

WHAT THIS SITE APPEARS TO BE

Japanese press-release distribution and news portal (Atpress) featuring many company press releases, rankings, and category feeds. Appears to be a standard commercial PR/news platform.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2001.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a Japanese press-release distribution and news portal presenting company announcements, product launches, events, rankings, and category-based news feeds. Its apparent business model is commercial press-release distribution supported by paid packages, sponsored content or advertising, and premium account features for companies and public-relations agencies.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there were no phishing, impersonation, malicious-reputation, or confirmed blacklist indicators. The site's substantial, continuously maintained historical presence is consistent with an established publication platform rather than a newly created imitation. Automated behavioral testing observed some external network activity and console errors, but the activity was not accompanied by cloaking, hidden forms, credential exfiltration, wallet activity, or other high-risk interaction patterns; the resulting assessment treated it as benign site behavior.

EVIDENCE

- The domain registration record shows creation on 2007-04-12 and an age of 19.35 years.
- Web-archive coverage records 3,562 snapshots spanning 2001–2026, with 26 years tracked and a maximum gap of 1 year.
- External reputation checks returned no malicious or suspicious detections, and the site was present within the global top one million by traffic.
- The homepage is categorized as a press-release/news portal, with no detected brand-impersonation or phishing indicators.

Regulatory Verification Notes

The site presents an informational and commercial media-distribution model rather than a regulated financial service. The supplied content does not establish an independently verified real-world operator identity, and the available disclosure state is unclear; this is a transparency matter for commercial engagement, not evidence of a scam. No broker-dataset match was identified, although that contextual result is not a licensing or regulatory determination. For paid arrangements, the contracting entity, applicable terms, cancellation or refund provisions, and any jurisdiction-specific business disclosures should be confirmed independently.

EVIDENCE

- The homepage describes press-release distribution, receipt of releases, company announcements, rankings, and category feeds.
- The site's hosting infrastructure is served from AS396982, Google Cloud Platform, operated by Google LLC in the United States.
- The site's TLS certificate is issued by WR3, uses domain validation (DV), and is valid to 2026-10-17.
- The supplied third-party broker-context check recorded no match; this does not verify licensing.

What to Verify Next

Before credential or payment interactions connected with paid services, independently confirm the legal contracting entity and review the applicable commercial terms, cancellation or refund provisions, and payment-protection arrangements. Any claim that a particular service requires regulatory authorization should be checked against the relevant official registry, while support and business contact channels should be confirmed through an independent source.

EVIDENCE

- The homepage exposes account login and registration functions but no sensitive form was detected during the supplied page and behavior analysis.
- The site presents commercial distribution services for companies and public-relations agencies, making contracting and payment terms the relevant verification points.
- The supplied analysis found no untrusted form destination, hidden sensitive form, or external password form.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. The website's operator identity remains independently unverified, so legitimacy should be treated as evidence-consistent rather than proven.

Infrastructure Integrity

The site resolves to Google Cloud Platform infrastructure with one identified address and no detected CDN or WAF layer. Google Cloud hosting and a valid TLS deployment provide conventional infrastructure integrity and reduce some exposure concerns, but they are mitigating technical signals only and do not independently establish the operator's identity.

Closing Assessment

Ordinary browsing is proportionate to the assessed posture; before submitting credentials or making payments, standard independent checks of merchant identity, commercial terms, and payment protections should be completed.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of atpress.ne.jp.

- The request stayed on atpress.ne.jp. It was not redirected to another domain. CLEAR
- DNS for this domain is served by dnsv.jp, across 4 name servers. NOTED
- The earliest public archive of this site is from 2001-03-01. CLEAR
- It is hosted on GOOGLE-CLOUD-PLATFORM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about atpress.ne.jp at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
