

Is atssamxli.com a scam? TrustSniffer's high-risk assessment: 5/100

atssamxli.com

Verdict

5

OUT OF 100

CRITICAL RISK

atssamxli.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

A Plesk-generated default domain placeholder page promoting Plesk and related tools. No transactional elements or forms are present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	None flagged it VirusTotal	CLEAR
Google Safe Browsing	Listed as unsafe Google	RISK
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	12 years old Registered history	CLEAR
Web archive	Archived since 2016 Public history exists	CLEAR
Certificate	Encrypted connection Issued by YR2	NOTED

The page as captured

<https://atssamxli.com/>

What atssamxli.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2016.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website is a Plesk-generated default hosting placeholder for atssamxli.com. It presents visitors with Plesk hosting-management information, including Sitejet Builder and WP Guardian, rather than a functioning commercial service, account area, or transaction flow.

Scam/Impersonation Risk

The site has a **confirmed blacklist condition**: external reputation checks identify the domain through Google Safe Browsing and another blacklist source. This remains a material contradiction despite the homepage appearing to be a benign Plesk placeholder with no transaction, login, or sensitive-input form. The available evidence does not show brand impersonation or an on-page phishing form, but the external threat detections warrant a security-forward posture and make sensitive interaction inappropriate until the listing is independently resolved.

EVIDENCE

- The homepage is titled “Domain Default page” and states that it was generated by Plesk; it contains no commercial transaction flow or sensitive form.
- External reputation evidence records Google Safe Browsing as malicious and identifies the domain in an external blacklist; the associated threat classification is social engineering.
- Domain registration evidence records creation on 2014-06-09 and an age of 12.21 years.
- Archive records show first observation on 2016-09-05T10:45:46Z, last observation on 2025-07-10T00:28:25Z, and 10 years tracked.

Regulatory Verification Notes

The observed homepage does not identify an operating company, licensing authority, registration number, or regulated service. Because the page is only a hosting placeholder and does not present a financial or other regulated offering, this is a disclosure and verification gap rather than standalone proof of fraud. The available identity evidence is insufficient to independently verify a real-world operator, while the confirmed blacklist status remains the decisive concern. The transport certificate and hosting arrangement establish technical deployment, not legal identity or authorization.

EVIDENCE

- The homepage provides Plesk information and links to Plesk resources but does not present legal, licensing, or operator disclosures.
- The site is served from AS16276 (OVH - OVH SAS, FR).
- The TLS certificate is issued by YR2 at DV validation level and is valid to 2026-11-10T13:52:58+00:00.

What to Verify Next

Before any sensitive interaction, an independent party should confirm whether the domain is legitimately controlled by the claimed operator through an established offline or independently sourced corporate channel. If the domain is intended to provide a regulated service, its authorization should be checked directly against the relevant jurisdiction’s official register, and any blacklist listing should be resolved through the applicable authoritative process. Until those checks are complete, the site should be limited to non-interactive observation; credentials, account access, and financial activity should not be used through it.

EVIDENCE

- The observed homepage is a default hosting page rather than an identified operating business.
- The available identity status is “likely” rather than independently verified.
- The site’s external reputation status includes an active Google Safe Browsing match.

Summary Verdict

The website presents a **critical trust posture** for sensitive interaction. Its benign placeholder content does not offset the confirmed external threat detections, and the available evidence does not establish a sufficiently verified operator identity for account, credential, or financial use.

Infrastructure Integrity

The site is positioned behind CDN/WAF infrastructure, with the observed edge address 158.69.114.230 associated with AS16276 and OVH - OVH SAS, FR; the origin server was not observable in this analysis. This arrangement provides a mitigating layer against direct origin exposure, but it is an infrastructure-control measure rather than evidence of legitimacy.

Closing Assessment

Sensitive use should remain suspended unless independent ownership, regulatory status where applicable, and remediation of the external threat listing have been confirmed through trusted channels.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

- 01 Governance Risk

 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
 - Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	37%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of atssamxli.com.

- The request stayed on atssamxli.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudns.net, across 2 name servers. NOTED
- The registration is paid up to 2027-06-09. NOTED
- The earliest public archive of this site is from 2016-09-05. CLEAR
- It is hosted on OVH, from a server in CA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about atssamxli.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
