

Is atstech.co.za legit? TrustSniffer's high-trust assessment: 100/100

atstech.co.za

Verdict

100

OUT OF 100

HIGH TRUST

atstech.co.za appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-01 by automated analysis. Classification confidence 70%.

What this site appears to be

ATS All Tech Solutions is a South African outsourced IT provider offering VoIP, computer support, network and internet security, backups, hosting, website development, penetration testing, and consulting. The homepage includes business contact details, service descriptions, testimonials, blog content, and a general contact form.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2009.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

ATS All Tech Solutions is a South African outsourced IT services provider presenting VoIP, computer support, network and internet security, backups, hosting, website development, penetration testing, and consulting for business customers.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand impersonation, or malicious-reputation findings were observed. The homepage presents a coherent corporate B2B model, named services, testimonials, social-media links, and a standard contact form without login, payment, cryptocurrency, or sensitive-data collection features. The domain and historical presence are consistent with an established operating entity rather than a newly created or repurposed site.

EVIDENCE

- The homepage identifies ATS All Tech Solutions as an outsourced IT provider and describes business services including VoIP, support, security, hosting, and penetration testing.
- The homepage contains a standard contact form; testing found no login form, hidden sensitive form, wallet connection, clipboard hijacking, or cloaking.
- The domain was registered in 2007 and is approximately 18.9 years old.
- The site has 65 archive snapshots spanning 2009–2026, covering 18 tracked years.

Regulatory Verification Notes

The site's legal and commercial presentation is consistent with an IT services company rather than a financial or investment provider. No licensing claim or registration number is evidenced, which is a limited disclosure point for any customer requiring formal corporate or professional-services verification; it is not, by itself, evidence of deceptive conduct. The available third-party reputation context contains no broker match or confirmed warning.

EVIDENCE

- The homepage identifies the business model as outsourced IT services and consulting rather than a regulated financial activity.
- The registration record names ATS All technology Solutions CC and lists Domains as registrar.
- Hosted on AS328816 (ATS All Technology Solutions (Pty) Ltd, South Africa).
- TLS certificate issued by YR1 (DV), valid to 2026-09-22.

What to Verify Next

For a prospective commercial engagement, confirm the contracting entity, service scope, support commitments, and any sector-specific licensing requirements through the site's published business channels and applicable South African registries. Security-sensitive customers should also validate penetration-testing deliverables, data-handling terms, and backup responsibilities before execution of a contract.

EVIDENCE

- The homepage provides dedicated service categories for computer support, penetration testing, hosting, website development, and consulting.
- The site advertises month-to-month contracts and a South African call centre, creating specific contractual points for confirmation.
- The contact section provides business telephone and email channels for independent commercial verification.

Summary Verdict

The site presents as a legitimate, established, and trustworthy corporate service provider. Its identity, operating model, historical continuity, clean reputation, and stable technical behavior converge on a high-confidence positive assessment.

Infrastructure Integrity

The site is directly hosted on ATS All Technology Solutions infrastructure, with no detected CDN or WAF layer and one resolved likely origin address. This provides a straightforward hosting posture, although the absence of an intermediary protection layer means infrastructure should be viewed as a supporting factor rather than proof of legitimacy.

Closing Assessment

Normal browsing, account interaction where applicable, and standard business engagement are appropriate, subject to ordinary contractual and service-level checks.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

About this assessment

A trust score summarises the evidence TrustSniffer could collect about atstech.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a

legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
