Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website presents itself as Attic Property Consultants Ltd, a Kenya-based property valuation and estate-agency business offering valuations, estate agency and management, project-development consultancy, property listings, and a property-search interface for prospective clients.

Scam/Impersonation Risk

The site's visible content is a coherent corporate real-estate presentation and does not show a login form, credential-harvesting flow, investment scheme, or page-level brand impersonation. However, the domain is subject to a confirmed blacklist classification and multiple external malicious or suspicious detections, creating a material contradiction that outweighs the otherwise ordinary site presentation. A separate abuse report concerns shared hosting infrastructure rather than being directly attributed to this website, and the associated confidence score is zero; that signal is therefore discounted, but it does not remove the domain-level reputation concern.

EVIDENCE

- The homepage presents property consultancy services, property search, contact functionality, and no login or password-submission form.
- Domain reputation telemetry recorded 4 malicious and 2 suspicious detections across 11 evaluations, together with an external blacklist hit.
- Runtime observation recorded 0 external XHR requests, 0 wallet-connect executions, 0 hidden forms, and 0 externally submitted password forms.

Regulatory Verification Notes

The About/profile content identifies Attic Property Consultants Limited as a registered professional company and describes more than ten years of activity, with operations stated to have begun in March 2012. The available evidence does not independently verify the real-world operator behind those claims, and the site does not state a license authority or license number; this is a regulatory-transparency gap rather than, by itself, proof of fraud. The domain's long registration history and established historical presence are positive provenance indicators, but they do not neutralize the confirmed reputation contradiction. A valid domain-validated certificate and identifiable hosting arrangement provide technical continuity, not legal or regulatory validation.

EVIDENCE

- The homepage/profile content states that Attic Property Consultants Limited is a registered professional company providing valuations, estate agency and management, and development consultancy.
- Domain registration telemetry: registered 2012-04-25; approximately 14.33 years old; registrar Asterisk Technologies; expiry 2027-04-25.
- Archive telemetry records 45 snapshots spanning 2017–2026, with 10 years tracked; coverage is sparse but does not indicate a recent domain creation.
- Hosting and transport telemetry: served from AS51713, WHG-LON – WHG Hosting Services Ltd, GB; TLS certificate issued by YR2 at DV validation level, valid to 2026-09-30.

What to Verify Next

Before any sensitive interaction, an independent check should confirm that the company name, physical presence, telephone details, and responsible professionals correspond to authoritative Kenyan business and property-sector records. Any proposed valuation, agency, management, or development engagement should also be documented through independently confirmed contact channels and contractual payment-protection arrangements, with no reliance on the website alone.

EVIDENCE

- The About/profile pages provide the company name, service descriptions, and stated operating history for comparison against authoritative records.
- The Contact and services pages provide the details that should be validated through an independently sourced route before engagement.

Summary Verdict

The overall posture is **critical trust risk**, with sensitive interactions unsuitable on the available evidence. The site's conventional corporate presentation and technical continuity are materially outweighed by confirmed external reputation contradictions and the absence of independently verified operator identity.

Infrastructure Integrity

The website resolves directly to infrastructure operated by WHG-LON – WHG Hosting Services Ltd, with no CDN or WAF edge identified and a likely origin address exposed through the observed hosting configuration. This provides limited infrastructure-layer mitigation and should not be treated as evidence of legitimacy.

EVIDENCE

- Infrastructure resolution identified 1 unique IP, 0 CDN edge IPs, and 1 likely origin IP.
- The resolved hosting country is GB, with the registry identified as RIPE NCC.

Closing Assessment

Prospective users should restrict activity to passive review until the operator, applicable authorization, and payment arrangements have been independently validated; credentials, financial information, and consequential transactions should not be submitted in the interim.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about atticconsultants.co.ke at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
