

Is atv.com.tr legit? TrustSniffer's high-trust assessment: 90/100

atv.com.tr

Verdict

90

OUT OF 100

HIGH TRUST

atv.com.tr appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 55%.

What this site appears to be

Turkish broadcast/media page (atv) with extensive cookie and tracking disclosures. Content focuses on TV programming and privacy/cookie settings; monetized via many third-party ad vendors.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

atv.com.tr presents a Turkish broadcast and media service centered on television programmes, local series, entertainment content, privacy settings, and advertising-supported access. Its apparent business model is free media distribution financed through third-party advertising, content partnerships, cookies, and personalized marketing rather than financial transactions.

Scam/Impersonation Risk

No contradictions were observed: the available evidence identifies no phishing, impersonation, malicious reputation, or confirmed blacklist signal. The homepage presents coherent broadcast-media content, provides extensive cookie and advertising disclosures, and contains no login form, sensitive form, wallet connection, or other high-risk transaction mechanism. The observed advertising and tracking activity is consistent with the stated media business model rather than evidence of an abuse pattern.

EVIDENCE

- The homepage is classified as “Media / Broadcast” and presents Turkish television programming, including the title “Dizi atv’de izlenir | En iyi yerli diziler, programlar atv’de!”
- The homepage contains no sensitive forms, external password forms, hidden forms, wallet-provider activity, or clipboard-hijacking behavior.
- Domain registration records show registration on 1996-10-15, an age of 29.86 years, and an expiry date of 2027-10-14.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no phishing or blacklist result.

Regulatory Verification Notes

The site is an established-looking broadcast and advertising platform, not a financial service presenting a licensing claim. Its privacy and cookie material explains the use of necessary and optional cookies, personalization, advertising, and third-party processing; however, the available evidence does not independently verify the real-world operator identity. The absence of a financial license claim is appropriate to the apparent media business model, but corporate identity and data-protection accountability should be confirmed through the site’s legal and privacy materials before any credential or payment interaction. A separate broker-reputation dataset produced no match; this is contextual only and is not a licensing determination.

EVIDENCE

- The privacy and cookie material states that cookies are used for service functionality, personalization, advertising, and marketing, with user preference controls.
- The site’s transport encryption uses a DV certificate issued by Go Daddy Secure Certificate Authority - G2, valid to 2026-11-06.
- Hosting is provided through AS16509, Amazon.com, Inc. (AMAZON-02), US.
- The homepage identifies an advertising-supported broadcast/media model and does not present a financial-services license number or regulatory authorization.

What to Verify Next

Before credential or payment interactions, an institution should independently confirm the legal operator named in the site’s privacy and legal documentation, check that the applicable privacy and consumer-protection obligations are addressed, and validate official contact channels through an independently sourced route. Any commercial transaction should also be covered by ordinary merchant-identity, return-policy, and payment-protection checks.

EVIDENCE

- The site provides privacy and cookie preference information that can be compared with the legal operator and data-controller details identified in its formal disclosures.
- The available page analysis found no login or sensitive transaction form, so any later request for such information should be assessed against the site's ordinary media purpose.
- The site's apparent advertising-supported model provides a basis for checking whether any proposed payment request is genuinely part of an official service flow.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture. The evidence supports normal browsing and ordinary media use, while independent confirmation of the real-world operator remains appropriate before credentials or payments are submitted.

Infrastructure Integrity

The site is protected by Amazon CloudFront CDN/WAF infrastructure, with observed edge servers and potential origin candidates. This architecture provides a meaningful exposure-mitigation benefit and is consistent with a professionally operated web service, but protective infrastructure alone does not establish ownership or legitimacy.

EVIDENCE

- CloudFront edge IPs observed: 18.165.122.10, 18.165.122.14, 18.165.122.69, and 18.165.122.83.
- The infrastructure resolved through Amazon CloudFront, with six unique observed IPs, four identified as edge addresses, and two potential origin candidates.

Closing Assessment

Ordinary media browsing is proportionate to the assessed posture; credentials or payments should be provided only after the independent identity, consumer-protection, and payment checks described above are satisfactory.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of atv.com.tr.

- The request stayed on atv.com.tr. It was not redirected to another domain. CLEAR
- DNS for this domain is served by awsdns-51.net. NOTED
- The registration is paid up to 2027-10-14. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about atv.com.tr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
