Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2008.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

ATV Perú is an established television broadcaster and digital-news portal offering live ATV, ATV+, and ATV Sur channels, program schedules, and coverage of current affairs, entertainment, sports, technology, gaming, and finance. Its apparent business model is commercial broadcasting and advertising, including personalized advertising and media-placement services.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or adverse threat-reputation findings were observed. The registered organization is consistent with a Peruvian broadcasting operation, while the site's long domain history and extensive archival record support continuity rather than recent repurposing. Interactive testing also found no credential-harvesting forms, hidden forms, cloaking, wallet interaction, clipboard manipulation, or suspicious scripts.

- The domain registration identifies ANDINA DE RADIODIFUSION S.A.C. as the owner and NIC.PE as the registrar.
- Registered in 2008 (~18.5 years old); 5,000 archive snapshots span 2008–2022, covering 15 tracked years without evidence of suspicious repurposing.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing classification, no abuse reports, and no signature matches.
- The homepage contained no login form, sensitive form, hidden form, or untrusted form destination.

Regulatory Verification Notes

The supplied homepage presents contact, ethics, privacy-consent, social-action, and digital media-kit material, providing meaningful operational context for a media publisher. No regulatory license or registration number was captured on the assessed page; for a television broadcaster, any jurisdiction-specific authorization should therefore be confirmed from the relevant Peruvian authority when such status is material to institutional engagement. This is a disclosure-verification point, not evidence of deception or illegitimacy.

- The homepage provides dedicated “Contact,” “Code of Ethics,” “Social Action,” and “Digital Media Kit” navigation.
- The assessed page includes consent disclosures covering personalized advertising, precise geolocation, device identification, and notifications.

- No financial-return promise, investment solicitation, cryptocurrency offering, or deposit request appeared on the homepage.
- No licensing authority or license number was stated in the captured homepage content.

What to Verify Next

Institutional due diligence should confirm the corporate record for ANDINA DE RADIODIFUSION S.A.C., obtain any broadcasting authorization relevant to the intended engagement directly from the competent registry, and validate official commercial or support channels through independently sourced details. Advertising or data-processing engagements should also be reviewed against the site’s privacy and consent terms.

- The published corporate identity supplies a specific legal name against which registry records can be matched.
- The site’s commercial media offering creates a clear basis for validating contracting authority before advertising procurement.
- The consent interface identifies categories of personal-data processing that warrant review during privacy or vendor-risk onboarding.

Summary Verdict

The website is legitimate, established, and trustworthy. Its identity, historical continuity, clean security reputation, substantive editorial presence, and benign observed behavior converge on a high-confidence posture with no contradictory risk signals.

Infrastructure Integrity

The site is served through Amazon infrastructure protected by an AWS CDN/WAF, with only an edge address observed; this reduces direct origin exposure but is a security mitigation rather than independent proof of legitimacy.

- Hosted on AS16509 (AMAZON-02 — Amazon.com, Inc., US), with observed edge IP address 3.140.14.47.
- Transport encryption uses a valid domain-validated certificate issued by YR1, valid through 2026-10-29.

Closing Assessment

Normal interaction, including account login and standard use, is appropriate; ordinary institutional onboarding controls remain sufficient for any formal commercial engagement.

Written analysis generated 2026-08-04 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of atv.pe.

- The request stayed on atv.pe. It was not redirected to another domain. CLEAR
- Registration is published under NIC.PE. CLEAR
- DNS for this domain is served by atv.pe, across 2 name servers. NOTED
- The earliest public archive of this site is from 2008-01-30. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about atv.pe at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
