

Is audioprobootcamp.com safe? TrustSniffer's low-trust assessment: 40/100

audioprobootcamp.com

Verdict

40

OUT OF 100

LOW TRUST

audioprobootcamp.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Parked domain page hosted by Epik offering the domain for sale, with contact owner CTA, list of accepted currencies (including cryptocurrencies), and copyright/WHOIS privacy notices.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What audioprobootcamp.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2020.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Audioprobootcamp.com is a parked domain-sale page presented through the Epik platform, offering the domain to prospective buyers and directing visitors toward contacting its current domain holder rather than providing an active audio-training service or other substantive business operation.

Scam/Impersonation Risk

The site presents a **high-risk trust posture for sensitive interactions** because external threat intelligence recorded four malicious detections and confirmed blacklist status for the domain. This is materially inconsistent with treating the domain as an established operating business, although the page itself does not contain a login form, credential-collection form, or active service workflow. Three abuse reports associated with the hosting IP are expressly attributed to shared infrastructure and carry zero confidence, so they are a limited contextual signal rather than direct evidence against this specific parked page. No distinct legal-entity inconsistency or brand-impersonation finding was recorded.

EVIDENCE

- The homepage is classified as a parked domain / for-sale page and contains no login or sensitive submission form.
- External evaluation recorded 4 malicious detections and a confirmed blacklist status for the domain.
- The hosting IP was associated with 3 abuse reports, explicitly attributed to shared infrastructure with a confidence score of 0.
- Historical records show 6 archive snapshots from 2020-08-03 through 2021-02-26, covering 2 tracked years.

Regulatory Verification Notes

The observed page does not disclose a financial-service license, registration number, or regulated operating entity; given that it is a domain marketplace listing, this is a transparency and intended-use verification gap rather than proof of a regulated business. The registration record names Epik LLC as registrar and identifies the registrant as Privacy Administrator under Anonymize LLC, which describes an administrative privacy arrangement but does not independently establish the real-world operator of the domain. Transport security is present, but a domain-validated certificate confirms control of the web address, not the legitimacy of an underlying business. No broker match was returned in the available third-party context.

EVIDENCE

- The registration record lists Epik LLC as registrar and shows creation date 2026-03-26; historical provenance separately records a reconciled domain age of 6.0424366872005475 years.
- The site's hosting infrastructure is served from AS394456, EPIK-LLC - Epik LLC, US.
- The site's TLS certificate is issued by YR1, uses DV validation, and is valid to 2026-09-17.
- The homepage contains domain-sale and owner-contact content but no license authority or license number.

What to Verify Next

Before any purchase or other sensitive interaction, an organization should confirm through an independently obtained Epik channel that the sale listing and payment destination are genuine, and separately establish who controls the domain and what rights are conveyed with it. If the domain later becomes an operational service, its stated company, terms, refund provisions, and any claimed licensing should be checked against the relevant official registry before engagement. Contact channels should also be validated through an independent, offline route rather than relying solely on the page.

EVIDENCE

- The homepage offers a “Contact Domain Owner” action and describes domain delivery and buyer-protection services.
- The page lists payment support for fiat currencies and cryptocurrencies including BTC, ETH, LTC, XRP, USDT, and USDC.
- Behavioral testing recorded 0 external XHR requests, 0 hidden forms, and 0 wallet-connection runs across 2 successful runs.
- The page links externally to Epik, Anonymize, Facebook, Twitter, and LinkedIn.

Summary Verdict

The overall posture is **low trust**, with elevated exposure for credentials, account access, and financial activity. The page appears to be a legitimate domain-parking presentation in its immediate content and behavior, but that limited benign presentation does not overcome the confirmed external reputation contradiction or independently verify the domain’s real-world operator.

Infrastructure Integrity

The site resolves directly to one likely origin address hosted by EPIK-LLC - Epik LLC in the United States, with no detected CDN or WAF edge layer. This provides a clear hosting path for investigation but offers no substantial protective infrastructure as a mitigating control.

Closing Assessment

Passive inspection is the appropriate interim use; credentials, account access, and financial transactions should remain out of scope until the listing, counterparty, and transaction path have been independently authenticated.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

Signals weighed against the site

- AbuseIPDB: 3 reports on hosting IP 209.196.146.115 (Epik LLC, Data Center/Web Hosting/Transit), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	39%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of audioprobootcamp.com.

- The request stayed on audioprobootcamp.com. It was not redirected to another domain. CLEAR
- Registration is published under Epik LLC. CLEAR
- DNS for this domain is served by epik.com, across 2 name servers. NOTED
- The registration is paid up to 2027-03-26. NOTED
- The earliest public archive of this site is from 2020-08-03. CLEAR
- It is hosted on EPIK-LLC, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about audioprobootcamp.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
