

Is auroratelecom.ru legit? TrustSniffer's high-trust assessment: 100/100

auroratelecom.ru

Verdict

100

OUT OF 100

HIGH TRUST

auroratelecom.ru appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-02 by automated analysis. Classification confidence 70%.

What this site appears to be

Aurora Telecom offers business telephony and communications infrastructure in Russia, including SIP, VOIP trunks, virtual PBX, regional phone numbers, E1, and 8-800 services. The page provides indicative pricing, connection steps, contact information, and Russian legal entity details.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2014.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is Aurora Telecom, a Russian business telecommunications provider presenting intelligent telephony, SIP and VOIP services, virtual PBX, E1 connectivity, regional numbers, and 8-800 services for companies; its apparent model is recurring monthly service fees and tailored communications plans.

Scam/Impersonation Risk

No phishing, impersonation, malicious-reputation, or conflicting-identity indicators were observed. The commercial model is coherent for a B2B telecommunications operator, with service descriptions, indicative pricing, connection guidance, contact information, and a personal-data form directed to a trusted destination. A long-established domain, sustained historical presence, established traffic footprint, and clean external reputation reinforce the legitimacy assessment.

- Domain registration: 2011-06-22; approximately 15.12 years old.
- Web archive: 145 snapshots spanning 2014–2026, covering 13 years.
- External reputation checks recorded 0 malicious and 0 suspicious detections; no phishing or impersonation signal was recorded.
- The homepage presents a coherent B2B telecommunications model and no deceptive financial or cryptocurrency indicators.

Regulatory Verification Notes

The business and contact content identifies Russian legal-entity details and describes a conventional corporate service offering. The supplied pages do not present a license number or explicit regulatory authorization claim; this is a transparency item for ordinary procurement due diligence, not evidence of deception. The domain is registered through BEGET-RU, and transport security is provided by a valid DV certificate issued by R12.

- The homepage and contact material identify Russian legal-entity details and provide service, pricing, and connection information.
- The site's TLS certificate is issued by R12, uses DV validation, and is valid to 2026-08-19.
- The supplied analysis records no matched broker-reputation profile.

What to Verify Next

Before a formal business engagement, the contracting entity and applicable telecommunications authorization should be matched against the relevant Russian corporate and regulatory registers. Procurement should also

reconcile the selected service, recurring charges, activation terms, and data-handling provisions with the written agreement.

- The homepage pricing and connection sections provide the commercial terms to reconcile with the contract.
- The contact section provides the channel for confirming the contracting entity and service scope independently.
- The personal-data form warrants review of the applicable privacy and data-processing terms before submission.

Summary Verdict

The website presents as a legitimate, established, high-trust corporate service with a coherent identity and business purpose. No contradiction was identified that would impair normal interaction, including account login and standard use.

Infrastructure Integrity

The site resolves directly to one address hosted by AURORA-AS – Aurora Telecom LLC, RU, on AS210827; no CDN or WAF edge layer is identified. This direct hosting arrangement provides less edge-layer shielding than a CDN-backed deployment, but it is not inconsistent with the overall trust assessment.

Closing Assessment

Normal account access and standard service engagement are appropriate, subject to routine commercial due diligence proportionate to the value and duration of the proposed arrangement.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of auroratelecom.ru.

- The request stayed on auroratelecom.ru. It was not redirected to another domain. CLEAR
- Registration is published under BEGET-RU. CLEAR
- DNS for this domain is served by com., across 4 name servers. NOTED
- The registration is paid up to 2027-06-22. NOTED
- The earliest public archive of this site is from 2014-12-17. CLEAR

- It is hosted on AURORA-AS, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about auroratelecom.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
