

Is authly.in a scam? TrustSniffer's high-risk assessment: 0/100

authly.in

Verdict

0

OUT OF 100

CRITICAL RISK

authly.in shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

A Hostinger-hosted parked domain landing page that advertises hosting, website builder, VPS, domain search and business email. No forms or transactions on the page; purely promotional/redirect links to hosting services.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	14 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	33% confidence AbuseIPDB, 28 reports; shared hosting inflates reports	CLEAR
Domain age	1.5 years old Registered history	CLEAR

Certificate	Encrypted connection Issued by WR1	NOTED

The page as captured

https://authly.in/

Registered at  **HOSTINGER**

If this is your domain, you can manage it in your Hostinger account.

What authly.in served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2025.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a Hostinger parked-domain landing page for authly.in that presents promotional pathways to web hosting, AI-assisted website building, VPS hosting, domain search, and business email, with the apparent purpose of monetizing domain- and hosting-related conversions rather than providing an operating online service.

Scam/Impersonation Risk

The site should be treated as carrying **critical risk for sensitive interaction**. Its own landing page is a placeholder with no login, payment, or other transactional flow, and no page-level brand impersonation, phishing form, or conflicting legal identity was identified. That limited surface does not offset the stronger external contradiction: the domain is blacklisted, with malicious detections from multiple security providers. The reported abuse activity is attributed to a shared Hostinger provider IP rather than conclusively to this domain, but it remains a relevant infrastructure-level warning. No suspicious contact-email anomaly was identified in the supplied page evidence.

EVIDENCE

- The homepage is classified as a parked/placeholder page and promotes hosting, website builder, VPS, domain search, and business email services rather than operating a direct transaction.
- External reputation checks recorded 14 malicious and 1 suspicious detections, including Tier-1 detections from Fortinet, Kaspersky, and Sophos; blacklist status was confirmed.
- The hosting IP 2.57.91.91 has 28 abuse reports, attributed to shared infrastructure operated by Hostinger International Limited.
- The registration record states creation on 2026-04-10 and an age of 0.36 years; the archive record lists 0 snapshots, first seen 2025-02-02, last seen 2025-02-19, and 1 year tracked.

Regulatory Verification Notes

The available evidence does not independently verify the real-world operator identity. The registration record names CODEBURST OPC PRIVATE LIMITED, but that record alone does not establish that the entity operates the website. The landing page does not present a license, registration number, regulated-service claim, or substantive corporate disclosure; for a parked hosting-promotion page this is primarily a transparency and verification gap, not an identity contradiction. The site's TLS and hosting records demonstrate technical deployment, not legal authorization. No broker match was identified in the supplied third-party contextual check.

EVIDENCE

- The registration record lists registrar HOSTINGER operations, UAB and organization CODEBURST OPC PRIVATE LIMITED.
- The site's homepage contains promotional copy for hosting, AI website building, VPS, domain search, and business email but no license number or regulatory disclosure.
- The site is hosted on AS47583 (AS-HOSTINGER — Hostinger International Limited, CY).
- The TLS certificate is issued by WR1, uses DV validation, and is valid to 2026-09-30T16:09:32+00:00.

What to Verify Next

Before any sensitive interaction, an independent confirmation should establish whether CODEBURST OPC PRIVATE LIMITED is genuinely associated with the domain and whether the landing page is an authorized Hostinger parking page. Any claimed commercial or regulated activity should be checked against the relevant corporate or licensing registry using independently sourced contact details. The domain should not be treated as an operational service until its destination, ownership relationship, and intended business purpose are confirmed through an offline or otherwise independent channel.

EVIDENCE

- The homepage provides no login, password, payment, or other sensitive-input form.
- The page is identified as a parked domain for sale with promotional redirects rather than a functioning service portal.
- The supplied identity-verification status is unverified, with no independent brand or operator signals recorded.

Summary Verdict

The overall posture is unsuitable for sensitive interaction and should remain strongly cautionary. The site’s minimal parked-page presentation does not provide sufficient basis to establish a trustworthy operating entity, while the confirmed external contradictions determine the assessment.

Infrastructure Integrity

The site resolves to a single likely origin IP on AS47583, operated by Hostinger International Limited in Cyprus, with no CDN detected. A valid DV TLS certificate provides transport encryption, but hosting and certificate controls are mitigating technical characteristics only and do not establish legitimacy or offset the external reputation concerns.

Closing Assessment

Restrict activity to passive inspection until independent identity, authorization, and destination checks are complete; credentials and financial information should not be submitted.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine, behaviour in a sandbox, external reputation.

01 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 28 reports on hosting IP 2.57.91.91 (Hostinger International Limited, Content Delivery Network), 33% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of authly.in.

- The request stayed on authly.in. It was not redirected to another domain. CLEAR
- Registration is published under HOSTINGER operations, UAB. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2027-04-10. NOTED
- The earliest public archive of this site is from 2025-02-02. CLEAR
- It is hosted on AS-HOSTINGER, from a server in CY. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about authly.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
