Full analysis

Overview

This Spanish-language website presents Automociones Ureña as a Renault and Dacia dealership in Puerto de Mazarrón, offering new and used vehicles, workshop servicing, bodywork, electrical repairs, appointment booking, and customer contact channels.

Scam/Impersonation Risk

The website's visible content is coherent with a local automotive dealership: the homepage identifies Automociones Ureña, describes Renault and Dacia sales, and promotes workshop and bodywork services. It contains no observed brand-impersonation, phishing-form, cryptocurrency, or hidden-sensitive-form indicators. However, this benign presentation is outweighed by a material external contradiction: the domain is **blacklisted** by external reputation sources, with two malicious detections recorded in the evaluated results. Accordingly, the apparent dealership identity should not be treated as independently established, and sensitive interaction risk is elevated despite the ordinary commercial appearance.

EVIDENCE

- The homepage identifies “Automociones Ureña” as a Renault and Dacia agency in Puerto de Mazarrón and describes vehicle sales and after-sales services.
- The contact and appointment functionality presents a normal commercial contact funnel, with no detected login form, password-external form, or hidden form.
- External reputation evaluation recorded 2 malicious detections and an external blacklist hit for the domain.

Regulatory Verification Notes

The site describes retail vehicle sales and automotive servicing rather than a regulated financial or investment activity. Its available identity signal is therefore consistent with a local commercial business, but the operator’s real-world identity is only assessed as likely rather than independently verified. Licensing or corporate-registration disclosure is unclear on the supplied site content; this is a transparency matter requiring documentary confirmation, not by itself evidence of a scam. The absence of a broker-data match provides no regulatory endorsement.

EVIDENCE

- The homepage and service sections identify vehicle sales, workshop, bodywork, electrical repair, and appointment services as the business activities.
- Domain registration records show registration on 2016-06-02, with an age of 10.22 years and expiry on 2027-06-02.
- The site’s transport encryption uses a DV certificate issued by YR2, valid through 2026-11-03.

What to Verify Next

Before any sensitive interaction, an organization should independently confirm that Automociones Ureña is the current Renault/Dacia dealership represented by the domain, using an official manufacturer channel or an offline contact route. The legal entity named on quotations, invoices, vehicle-sale documents, and service agreements should be checked against applicable Spanish business records. Any proposed payment, deposit, vehicle purchase, or service booking should use a payment method with formal dispute and chargeback protections, and the transaction details should be confirmed independently of the website.

EVIDENCE

- The homepage supplies the dealership name, location, manufacturer affiliations, and service descriptions that can be cross-checked through independent channels.
- The contact and appointment pages provide the operational points at which dealership identity and transaction details should be confirmed.
- The site uses a single contact-intent form and does not expose a detected password or account-login workflow.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The site appears commercially coherent at the content level, but confirmed external reputation contradictions prevent the available evidence from supporting routine confidence in credentials, payments, or other sensitive engagement.

Infrastructure Integrity

The website is protected by a CDN/WAF arrangement, which is a mitigating control for direct origin exposure but does not establish legitimacy. The observed edge address was 82.223.28.85, served through AS8560 operated by IONOS-AS—IONOS SE in Germany, with the infrastructure resolving in Spain; the origin server was not observable in this analysis.

EVIDENCE

- Hosting infrastructure: AS8560, IONOS-AS - IONOS SE, DE; observed IP 82.223.28.85, country ES.
- The site's TLS certificate is DV-validated and issued by YR2, with validity ending 2026-11-03.
- CDN/WAF protection was present, with 1 observed edge IP and 0 observed origin candidates.

Closing Assessment

Sensitive actions should be deferred unless the dealership relationship and transaction details are independently confirmed through trusted offline or manufacturer-controlled channels; read-only review is the proportionate interim posture.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about automocionesurena.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
