

Is autoriparatori.org safe? TrustSniffer's low-trust assessment: 40/100

autoriparatori.org

Verdict

40
OUT OF 100

LOW TRUST

autoriparatori.org is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 75%.

What this site appears to be

Official site for Consorzio Aggiornamento Aziendale e Professionale (CAA). Provides information about courses (mechatronics, automotive), funded training, news, locations, contact form and consortium membership details.

Evidence status and limitations

Evidence completeness: **UNKNOWN**

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://autoriparatori.org/>

What autoriparatori.org served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2001.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website presents itself as the official online presence of Consorzio Aggiornamento Aziendale e Professionale (CAA), an Italian institutional training consortium offering automotive and mechatronics courses, funded training, professional services, news, locations, consortium information, and contact facilities. Its apparent business model is based on funded and paid vocational training and related member services.

Scam/Impersonation Risk

A confirmed blacklist hit creates a material contradiction to the otherwise institutional presentation and supports a high-risk posture for sensitive interactions. The homepage and navigation describe a conventional education and training organisation, with no visible fraud indicators in the supplied page content; however, behavioural testing detected two hidden forms across both runs, password-form activity, and a substantial DOM change after interaction. These technical findings do not establish the site's purpose by themselves, but they are inconsistent with treating the website as suitable for login, credential submission, or financial activity. No conflicting legal-entity names or brand-impersonation indicators were observed. The domain's long registration continuity and substantial historical presence provide provenance context, but do not override the confirmed blacklist signal.

EVIDENCE

- The external reputation assessment records the domain as blacklisted, while major search-safety results supplied in the analysis do not record a malicious hit.
- The behavioural assessment detected 2 hidden forms in 2 runs and 2 password forms.
- The behavioural assessment recorded 1,073 DOM mutations and a maximum post-interaction DOM difference of 1,073.
- Domain registration evidence records creation on 1999-04-23; the domain is 27.35 years old.

Regulatory Verification Notes

The site's pages describe CAA as a consortium providing professional education, including mechatronics and automotive training, funded courses, catalogue courses, member information, and contact services. The available evidence is consistent with an established institutional training website, but the real-world operator identity remains unverified. No licence, registration number, or regulatory authority is claimed in the supplied business-model evidence; for a training consortium this is a disclosure and verification matter rather than proof of fraud. The available third-party broker dataset contains no matching entity, which provides no additional broker-specific reputational conclusion. Transport encryption is present, but domain-validated TLS confirms encrypted communication rather than legal identity or organisational control.

EVIDENCE

- The homepage is titled "CAA | Consorzio Aggiornamento Aziendale e professionale" and identifies the organisation as a consortium.
- The site contains "Chi siamo," "Corsi Finanziati," "Corsi a Catalogo," "I nostri consorziati," and "Contatti" sections.
- The site's hosting infrastructure serves it through AS30722, identified as VODAFONE-IT-ASN - Fastweb SpA, IT.
- TLS is issued by YE1 at DV validation level and is valid to 2026-10-18.

What to Verify Next

Before any sensitive interaction, an independent party should confirm that the organisation named on the site is the intended operator through an authoritative Italian business or training-sector registry. Course enrolment, payment instructions, refund terms, and any request for account credentials should be validated through independently sourced contact channels rather than relying solely on the website. The purpose and ownership of the observed hidden or password-related form activity should also be clarified before credentials are submitted.

EVIDENCE

- The site presents a contact page and one visible contact form, while behavioural testing recorded additional hidden-form activity.
- The site provides telephone contact information and a login menu in its displayed content, but the supplied page analysis did not identify a conventional login form.
- The supplied legal and business-model evidence records no claimed licence authority or licence number.
- Historical records show 233 archive snapshots spanning 2001–2026, covering 26 tracked years.

Summary Verdict

The website has a credible institutional training presentation and substantial historical continuity, but the confirmed blacklist signal and sensitive-form behaviour materially outweigh those positive contextual indicators. Its overall posture is therefore low trust, with elevated risk concentrated on login, credential, payment, and other sensitive interactions.

Infrastructure Integrity

The site resolves directly to one likely origin address rather than through a detected CDN or WAF: AS30722, VODAFONE-IT-ASN - Fastweb SpA, IT, in Italy. This provides a clear hosting path but no specialised edge-layer mitigation; the presence of valid DV TLS supports transport security only and should not be interpreted as proof of legitimacy.

Closing Assessment

The appropriate operational posture is read-only use pending independent confirmation of the organisation and a satisfactory explanation of the site's sensitive-form behaviour; credentials, payments, and other high-impact actions should remain deferred.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- The structure of the page changed sharply while it was loading.

Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE

- The page contained a form a visitor cannot see.

Behaviour in a sandbox rule:BEHAV_HIDDEN_FORMS

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of autoriparatori.org.

- The request stayed on autoriparatori.org. It was not redirected to another domain. [CLEAR](#)
- Registration is published under TUCOWS.COM, CO.. [CLEAR](#)
- DNS for this domain is served by dnsitalia.net, across 4 name servers. [NOTED](#)
- The registration is paid up to 2027-04-23. [NOTED](#)
- The earliest public archive of this site is from 2001-04-21. [CLEAR](#)
- It is hosted on VODAFONE-IT-ASN, from a server in IT. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about autoriparatori.org at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
