

Is autosolthailand.com a scam? TrustSniffer's high-risk assessment:
0/100

autosolthailand.com

Verdict

0

OUT OF 100

CRITICAL RISK

autosolthailand.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Thai-language product/catalog page for AUTOSOL Thailand showing product categories (metal care, car care, household, industrial), company contact details, and navigation links. Appears to be a retail/distributor site for cleaning and metal-care products.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://autosolthailand.com/>

What autosolthailand.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a Thai-language retail and product-catalogue site for AUTOSOL Thailand, presenting metal-care, car-care, household, industrial-cleaning, motorbike, promotional, and retail-shop information. Its apparent business model is the promotion and distribution of cleaning and metal-treatment products through retail channels and company contact points rather than investment or financial services.

Scam/Impersonation Risk

The site presents a conventional retail catalogue and its captured pages contain no login form, credential-harvesting mechanism, payment form, or explicit brand-impersonation indicator. Nevertheless, the domain is **blacklisted by multiple external reputation sources**, with four malicious and one suspicious detection recorded, including a Tier-1 vendor detection. This is a material contradiction to the otherwise ordinary retail presentation and supports a high-risk posture for sensitive interaction. Three abuse reports also concern the hosting IP, but that signal is specifically attributed to shared provider infrastructure and carries zero confidence,

so it is supporting context rather than independent proof that the website itself generated the reported activity. No conflicting legal identities were observed.

EVIDENCE

- External reputation assessment: 4 malicious detections and 1 suspicious detection; blacklist status confirmed by sources including VT and an external blacklist.
- Homepage and captured site behavior: no login form, hidden form, sensitive form, wallet connection, or external POST activity detected.
- Domain registration: registered 2015-06-26, approximately 11.16 years old.
- Web archive: 86 snapshots spanning 2015–2026, with 12 years tracked.

Regulatory Verification Notes

The company and contact pages identify “บริษัท คาร์แลค (ไทย-เยอรมัน) จำกัด” and provide a Bangkok address and telephone contact, which establishes an on-site commercial identity claim but does not independently verify the real-world operator. The pages describe ordinary product distribution and do not present a financial-services license or registration number; this is a disclosure gap to resolve if the site is used for commercial purchasing or distributor engagement, although the stated retail model is not itself a financial-regulatory activity. The available third-party broker context contains no matching result and should not be treated as licensing confirmation. The confirmed external blacklist status remains the controlling concern despite the site’s conventional business presentation.

EVIDENCE

- Company and contact pages: named company, Bangkok address, telephone number, product categories, retail-shop navigation, and distributor-oriented contact information are presented.
- Licensing disclosure: no license authority or license number is stated on the reviewed pages.
- Page capture: the homepage was classified as an ecommerce/product-catalogue site, with no sensitive form detected.
- Web authority: page-authority signals are low and do not independently establish legitimacy.

What to Verify Next

Before any payment, account creation, or exchange of business information, the claimed distributor identity should be confirmed through an independently sourced AUTOSOL or manufacturer channel rather than relying solely on the website. Any applicable Thai company, distributor, consumer-protection, or product-safety registration should be checked against the relevant official registry, and payment should be limited to a protected method with a verifiable merchant name and documented refund process. Until the external detections are independently explained and resolved, sensitive interaction should not proceed.

EVIDENCE

- Company/contact pages: the site provides a claimed distributor identity that can be checked through an independent offline or manufacturer-controlled channel.
- Homepage behavior: no login or sensitive form was detected, so the primary immediate concern is external reputation rather than observed credential collection.
- Observed network behavior: 0 external XHR/fetch requests and 0 external POST requests were recorded across 2 successful runs.

Summary Verdict

The website has a critical trust posture because confirmed external threat detections and blacklist status outweigh its conventional retail presentation and apparent content quality. Its legitimacy and operator identity therefore remain unverified, and sensitive interaction is not supported by the available evidence.

Infrastructure Integrity

The site resolves to a single likely origin hosted by METRABYTE-TH in Thailand, without a detected CDN or WAF layer. This provides limited infrastructure-based mitigation; transport encryption is present, but a domain-validated certificate and direct hosting arrangement do not establish legitimacy.

EVIDENCE

- Hosting infrastructure: served from AS56067, METRABYTE-TH – 453 Ladplacout Jorakhaebua, TH, registry APNIC, country Thailand.
- TLS certificate: issued by YE2, validation level DV, valid to 2026-10-28T09:18:02+00:00.
- Origin posture: 1 unique IP, 0 edge IPs, and 1 likely origin IP; no CDN detected.

Closing Assessment

Prospective users should avoid submitting credentials or making payments through the site unless the claimed operator, applicable registrations, and external reputation findings have been independently validated and satisfactorily resolved.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule: KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule: KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 3 reports on hosting IP 103.30.127.7 (Metrabyte Co.,Ltd, Data Center/Web Hosting/Transit), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of autosolthailand.com.

- The request stayed on autosolthailand.com. It was not redirected to another domain. CLEAR
- Registration is published under ENOM, INC.. CLEAR
- DNS for this domain is served by hostatom.com, across 2 name servers. NOTED
- The registration is paid up to 2028-06-26. CLEAR
- The earliest public archive of this site is from 2015-08-01. CLEAR
- It is hosted on METRABYTE-TH, from a server in TH. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about autosolthailand.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
