Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1996.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is the corporate website of Autostrade per l'Italia, presenting motorway operations, traffic updates, tolling and customer services, infrastructure projects, investor relations, sustainability, and corporate governance information for the group and its related companies.

Scam/Impersonation Risk

No contradictions were observed. The site's content is consistent with a corporate motorway operator, with no detected phishing, impersonation, malicious-content, or suspicious-transaction indicators. Its homepage and related pages provide coherent institutional information, governance material, customer services, and infrastructure topics rather than promotional or abuse-oriented mechanisms. External reputation checks were clean, and the domain's long operating history and sustained archival presence support continuity of identity.

EVIDENCE

- The homepage identifies "Autostrade per l'Italia" and presents motorway operations, traffic information, customer services, investor relations, and group-company information.
- The domain was registered on 1996-01-29 and is 30.55 years old.
- The web archive records 1,275 snapshots spanning 1996–2026, covering 31 years.
- External checks recorded 0 malicious detections, 0 suspicious detections, no phishing-site warning, and no reported abuse for the observed CDN address.

Regulatory Verification Notes

The site presents a substantial corporate disclosure framework, including management, governance, anticorruption and antitrust policies, consumer-protection information, whistleblowing procedures, certifications, investor relations, and financial-reporting content. The registration record associates the domain with Bacchi Moreno and Autostrade S.p.A.; this is compatible with the corporate identity presented on the site and does not create an identity contradiction. No specific license or registration number was identified in the supplied pages, so applicable concession or authorization details remain a targeted verification matter rather than an indication of misconduct. The available third-party broker context contains no match and should be treated only as supporting reputational context.

EVIDENCE

- The “Who We Are,” management, governance, certifications, investor-relations, and corporate-policy pages identify the group’s institutional structure and operating activities.
- The domain registration record lists Register S.p.a. as registrar and Autostrade S.p.A. as the organization.
- The site is served on AS13335, CLOUDFLARENET – Cloudflare, Inc., US.
- The transport certificate is issued by WE1, uses DV validation, and is valid to 2026-10-05T17:05:20+00:00.

What to Verify Next

For a regulated procurement, infrastructure, or payment relationship, confirm the specific concession, authorization, or contracting entity applicable to the proposed service through the relevant public authority or counterparty records. Customer-service, payment, and account-related interactions should be initiated from the site’s own navigation and matched against the corresponding official service description. For material engagements, retain ordinary corporate due-diligence records covering the contracting entity, authority, and payment instructions.

EVIDENCE

- The site provides dedicated sections for customer services, tolling and payment methods, traffic information, investor relations, and infrastructure works.
- The governance area includes management, certifications, consumer-protection, antitrust, anticorruption, and whistleblowing material.
- The homepage identifies group companies and concession-related motorway entities with network and concession information.

Summary Verdict

The website presents a high-trust, established corporate posture with a coherent identity, mature institutional content, and no observed scam or impersonation contradictions. Normal interaction, including account login where offered and standard customer or payment use, is appropriate.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses are Cloudflare edge servers rather than directly exposed origin candidates. This architecture provides a mitigating layer against direct infrastructure exposure and is consistent with a professionally operated public-facing service, although protective infrastructure alone is not proof of legitimacy.

Closing Assessment

Normal browsing and standard account or service interactions are appropriate, while organizations pursuing material commercial or regulated engagements should complete their usual counterparty and authorization checks.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of autostrade.it.

- The request stayed on autostrade.it. It was not redirected to another domain. CLEAR
- Registration is published under Register S.p.a.. CLEAR
- DNS for this domain is served by autostrade.it. NOTED
- The registration is paid up to 2026-09-23. NOTED
- The earliest public archive of this site is from 1996-10-29. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about autostrade.it at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
