## Key findings

---

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1999.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

---

### Overview

An established Italian automotive marketplace, the website enables consumers and dealers to search, advertise, buy, and sell used vehicles through conventional listings, AI-assisted discovery, account services, seller-contact workflows, and automotive editorial content.

### Scam/Impersonation Risk

No identity contradictions, phishing indicators, impersonation evidence, or malicious reputation signals were observed. The domain's long-established registration and extensive historical capture materially support provenance, while its recognized traffic footprint and clean external reputation are consistent with an established public marketplace. The presence of visible login and registration functions is appropriate to the stated service and was not accompanied by hidden forms, credential forwarding, cloaking, or deceptive destination changes.

- Domain-registration records identify OVH as registrar and Autosupermarket SRL as the organization; registered 19 January 1998 (~28.56 years old).
- The domain has 1,098 archive snapshots spanning 8 May 1999–4 July 2026 (28 years tracked), with no substantiated evidence of suspicious repurposing.
- External reputation telemetry recorded 0 malicious and 0 suspicious detections, no reported abuse, and no phishing or impersonation finding.
- Public traffic telemetry places the domain at rank 63,137, within the global top one million websites.

### Regulatory Verification Notes

The homepage identifies Autosupermarket S.R.L. and provides legal, privacy, support, and corporate links, giving visitors a coherent operating identity. The supplied content also indicates a VAT disclosure and a clearly described marketplace service. No regulated financial, investment, or brokerage activity is presented, and no sector-specific licence claim is evident; consequently, the lack of such a claim does not conflict with the observed automotive marketplace model. Privacy governance warrants ordinary review because the consent interface covers personalized advertising, precise geolocation, device-related data, and an extensive vendor list.

- The homepage identifies Autosupermarket S.R.L. and links to legal, privacy, support, and corporate information.
- The privacy-consent interface requests choices concerning personalized advertising, precise geolocation, device-related processing, and numerous vendors.
- The available third-party broker-reputation context contains no match for the website or its operator.

What to Verify Next

Before purchasing a vehicle or transferring material funds, prospective customers should independently confirm the seller’s identity, authority to sell, vehicle ownership, registration records, condition, mileage, and payment instructions. Dealers considering commercial services should review the applicable subscription, listing, cancellation, and data-processing terms. Independent confirmation of official contact channels remains appropriate for any transaction involving sensitive documents or unusual payment requests.

- The homepage states that private sellers can publish advertisements and receive requests and offers from other users.
- The site presents approximately 198,458 vehicle advertisements, making listing-level verification distinct from assessment of the platform itself.
- Dealer-facing content promotes publication services and access to more than six million potential customers.
- Observed forms support seller contact, vehicle-availability requests, account registration, and dealer onboarding without sending sensitive forms to an untrusted destination.

Summary Verdict

The website is a legitimate, established, and trustworthy automotive marketplace. Its identity, provenance, public reputation, and observed application behavior converge without material contradiction. Normal interaction, including account login and standard platform use, is appropriate.

Infrastructure Integrity

The website uses Cloudflare’s mainstream CDN and WAF environment, so all observed addresses were protective edge nodes rather than a directly exposed origin server. This reduces direct infrastructure exposure and supports operational resilience, although protective hosting is not independently determinative of legitimacy.

- The site is served from AS13335 (Cloudflare, Inc., US); six observed addresses were Cloudflare edge servers.
- Transport encryption uses a valid WE1-issued domain-validated TLS certificate, valid until 26 September 2026.

Closing Assessment

Prospective users may engage normally with the platform while applying standard used-vehicle transaction controls to individual sellers, vehicles, documents, and payments.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 50%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

### What TrustSniffer observed

First-party facts recorded during the assessment of autosupermarket.it.

- The request stayed on autosupermarket.it. It was not redirected to another domain. CLEAR
- Registration is published under OVH. CLEAR
- DNS for this domain is served by cloudflare.com. NOTED
- The registration is paid up to 2026-10-07. NOTED
- The earliest public archive of this site is from 1999-05-08. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

### About this assessment

A trust score summarises the evidence TrustSniffer could collect about autosupermarket.it at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
