Full analysis

Overview

Auvjan Tour Planner is a commercial travel website presenting domestic and international tour packages, trekking and activity services, destination information, testimonials, blog content, booking calls to action, and customer contact options. Its apparent business model is to generate revenue through paid tour bookings and related travel services.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there are no confirmed phishing, impersonation, malicious-content, or blacklist indicators. The homepage presents a coherent travel-agency model, including India and international destinations, pilgrimage, honeymoon, wildlife, wellness, festival, and incentive tours, with booking inquiries rather than login or credential-collection functionality. Available external reputation checks found no malicious or suspicious detections, although coverage was partial. The site therefore appears consistent with an established, apparently legitimate travel business, while the real-world operator remains not independently verified.

EVIDENCE

- The homepage and destination pages present a consistent travel and tourism offering with tour packages, treks, activities, testimonials, and “Book Now” calls to action.
- The booking and contact forms are inquiry-oriented; no login form, hidden sensitive form, password submission, wallet connection, or external password form was detected.
- Domain registration: 2018-06-25; age 8.16 years.

Regulatory Verification Notes

The About Us and Contact Us pages provide business-facing contact details and an office address, supporting the apparent travel-operator identity, but the available evidence does not independently verify the legal entity behind the site. No travel-sector license, registration number, or licensing authority is claimed in the supplied site content; this is a disclosure gap requiring ordinary regulatory verification rather than evidence of a scam. The site uses valid domain-validated transport encryption, and the broader available reputation evidence is consistent with a low-risk commercial website. A mid-level page-authority signal provides contextual support but is not a regulatory or licensing determination.

EVIDENCE

- The About Us and Contact Us pages provide the operator name, office address, telephone contact, and booking-related contact routes.
- The site's transport encryption uses a DV certificate issued by YR2, valid to 2026-10-27T22:53:00+00:00.
- The site contains no supplied claim identifying a licensing authority or license number.

What to Verify Next

Before a credential or payment interaction, an independent check should confirm the merchant's legal identity, applicable travel-business registration or licensing, refund and cancellation terms, and the beneficiary name associated with any payment request. Contact details should be validated through an independent route, and payment should use a method offering appropriate transaction protection. The booking inquiry should also be checked for clear itinerary, inclusions, exclusions, and cancellation documentation before funds are committed.

EVIDENCE

- The homepage and package pages contain paid-tour booking calls to action and advertised package pricing.
- The Contact Us page provides the stated office and telephone details for independent validation.
- The site includes a contact/booking inquiry form and a newsletter form rather than an account-login workflow.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a **high-trust, low-risk posture** and no observed scam or impersonation contradiction. The classification supports ordinary commercial

engagement, subject to the operator-identity uncertainty and standard checks appropriate for an online travel merchant.

Infrastructure Integrity

The site resolves to a single direct hosting endpoint on AS31898, operated by ORACLE-BMC-31898 / Oracle Corporation in the United States, with no detected CDN or WAF layer and one likely origin IP. Oracle-hosted infrastructure and stable resolution are mitigating technical signals, but protective infrastructure alone does not establish the operator’s legitimacy.

Closing Assessment

Normal browsing and booking research are proportionate to the current assessment; payment or credential submission should follow independent merchant-identity, contractual, and payment-protection checks.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about auvjan.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
