

Is avanta-telecom.ru legit? TrustSniffer's high-trust assessment: 100/100

avanta-telecom.ru

Verdict

100

OUT OF 100

HIGH TRUST

avanta-telecom.ru appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-03 by automated analysis. Classification confidence 75%.

What this site appears to be

Russian-language homepage for Avanta Telecom, a Krasnodar telecommunications provider. It presents internet and bundled-service tariffs, subscriber payments, promotions, support resources, application forms, company contact details, a physical office address, and personal-data processing disclosures.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2016.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the Russian-language service portal of Avanta Telecom, a regional telecommunications provider serving Krasnodar with home internet, IPTV, video-surveillance, access-control equipment, subscriber payments, connection applications, and customer-support functions funded through published monthly tariffs and add-on services.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, malicious reputation findings, or other substantive fraud indicators were observed. The homepage consistently identifies ООО «АВАНТА ТЕЛЕКОМ» and presents a coherent regional telecommunications business, while the domain's long registration history and continuous archival record materially support provenance. The site's forms correspond to ordinary provider workflows, and testing found neither hidden forms nor credential exfiltration, wallet-draining, clipboard hijacking, or cloaking behavior.

- The homepage presents ООО «АВАНТА ТЕЛЕКОМ» as a Krasnodar provider and consistently supports that identity through service descriptions, tariff information, a physical office address, and customer-service functions.
- The domain was registered on 9 September 2015 and is approximately 10.91 years old; its current registration runs to 9 September 2027 through REGTIME-RU.
- The web archive contains 306 snapshots spanning 31 August 2016 to 7 June 2026, covering 11 tracked years with no established semantic repurposing.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no safe-browsing alert, no abuse reports, and an established global traffic rank of 54,213.

Regulatory Verification Notes

The homepage provides a named corporate identity, physical location, personal-data consent language, and a referenced policy for processing and protecting personal information. No specific telecommunications licence or registration number was identified in the supplied page content; this is a disclosure-verification point rather than evidence of fraud or illegitimacy. No matching third-party broker record was found, but that dataset is not relevant evidence of telecommunications authorization and does not alter the assessment.

- The service-connection form on the homepage requires affirmative consent to the stated personal-data processing and protection policy.

- The homepage publishes transparent recurring tariffs, including internet plans from 100 Mbps to 500 Mbps, with monthly prices and service-specific application options.
- The site is served from AS56701 by AVANTA-AS — LLC “AVANTA TELECOM,” RU.
- The site’s transport encryption uses a valid DV certificate issued by YR1, valid until 15 October 2026.

What to Verify Next

For procurement, regulated onboarding, or material contractual commitments, the legal entity details should be matched against the applicable Russian corporate and telecommunications registries, and any required service authorization should be confirmed directly with the relevant authority. Contracting parties should also reconcile the published tariffs, coverage address, service-level terms, equipment charges, cancellation provisions, and personal-data conditions with the final subscriber agreement. Official contact channels may be confirmed independently before initiating corporate procurement or transferring substantial funds.

- The homepage exposes service-connection, account-payment, contact, job-application, and support-question workflows, making confirmation of the intended transaction path relevant to onboarding.
- The connection application distinguishes internet, IPTV, video surveillance, intercom, barrier-control, mesh-network, camera, and router requirements, which should be reflected accurately in the resulting contract.
- The homepage provides a physical office address and telephone contact that can support independent corporate verification.
- Subscriber applications explicitly extend personal-data processing to information later entered in the personal account, making review of the referenced privacy policy appropriate for institutional users.

Summary Verdict

The website is a legitimate, established, and trustworthy regional telecommunications portal. Its consistent corporate presentation, durable provenance, clean external reputation, routine commercial model, and benign observed behavior converge strongly in support of normal use, with no contradictory fraud signals identified.

Infrastructure Integrity

The site resolves directly to a likely origin address operated by the provider’s own network rather than using a CDN or WAF. This creates no identified trust concern in the supplied evidence, although direct origin exposure offers less perimeter abstraction than an edge-protected deployment; infrastructure alone is treated as supporting operational context, not proof of legitimacy.

Closing Assessment

Normal interaction—including account login, service applications, subscriber payments, and standard account activity—is appropriate, subject to ordinary contractual and counterparty checks for material enterprise engagements.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
--------	------------

Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of avanta-telecom.ru.

- The request stayed on avanta-telecom.ru. It was not redirected to another domain. CLEAR
- Registration is published under REGTIME-RU. CLEAR
- DNS for this domain is served by net., across 2 name servers. NOTED
- The registration is paid up to 2027-09-09. NOTED
- The earliest public archive of this site is from 2016-08-31. CLEAR
- It is hosted on AVANTA-AS, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about avanta-telecom.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
