Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Avior International is a small online retail storefront presenting carpets, rugs, kilims, and pillows through product categories, promotional offers, testimonials, and contact-based ordering; its apparent business model is direct sale of home-furnishing goods.

Scam/Impersonation Risk

The site presents as an ordinary retail business and the captured homepage contains no login, payment, wallet, or other sensitive-data form. However, that benign page behavior does not offset the decisive external risk signal: the domain has a confirmed blacklist hit, with multiple malicious detections recorded by external reputation services. This is a material contradiction to treating the site as suitable for credentials, payment details, or other sensitive interaction. No conflicting legal-entity names or explicit brand impersonation were observed, but the available evidence does not independently verify the operator behind the Avior International presentation.

EVIDENCE

- External reputation assessment recorded 6 malicious detections and a confirmed blacklist status for the domain.
- Archive records show 6 snapshots spanning 2023-08-20 to 2025-07-10, with 3 years tracked.
- WHOIS records list registration creation as 2026-05-18T12:42:39Z and domain age as 0.26 years.

Regulatory Verification Notes

The site identifies itself as Avior International and describes a conventional retail business rather than a financial or investment service. Its pages provide business-contact information, but the captured material does not establish an independently verified legal operator, corporate registration, or licensing position; the on-site disclosure state is therefore unclear. The absence of a financial licence is not itself evidence of a scam for a rug and home-furnishing retailer, but the combination of unverified identity and confirmed external reputation warnings prevents reliance on the site's own business presentation as proof of legitimacy.

EVIDENCE

- The homepage and about/contact navigation identify the business as "Avior International" and present retail categories for carpets, rugs, kilims, and pillows.
- The site's transport encryption is a DV certificate issued by YR1, valid to 2026-10-08T01:12:53+00:00.
- Hosting telemetry identifies AS394695, PUBLIC-DOMAIN-REGISTRY - PDR, US, with resolution in India.

What to Verify Next

Before any commercial engagement, the business name, physical address, telephone number, ownership, and return or refund terms should be independently matched against authoritative corporate or commercial records. Any proposed payment should be made only through a payment method offering meaningful dispute and chargeback protection, after confirming that the beneficiary name matches the independently verified business. Contact channels should also be confirmed through an independent, offline route rather than relying solely on information presented on the site.

EVIDENCE

- The contact page publishes an Indian physical address and telephone number that can be checked independently.
- The homepage includes testimonials attributed to named individuals, but the captured material does not independently substantiate those testimonials.
- The captured homepage contains no visible payment or sensitive-data form, so any later checkout or payment request would represent a separate interaction requiring review.

Summary Verdict

The overall posture is **critical risk**. The website's retail presentation is not sufficient to overcome the confirmed external threat and reputation contradictions, and the operator's real-world identity remains unverified. Sensitive interaction is not supported by the available evidence.

Infrastructure Integrity

The site resolves directly to one identified hosting address rather than through a trusted CDN, with infrastructure hosted by PUBLIC-DOMAIN-REGISTRY - PDR, US, on AS394695. The site therefore lacks the mitigating separation normally provided by mainstream CDN/WAF edge infrastructure; its valid DV TLS certificate protects transport confidentiality but does not authenticate the business operator.

Closing Assessment

Prospective engagement should remain limited to non-sensitive observation until independent business verification and payment-protection checks have been completed; credentials, financial details, and high-value transactions should not be submitted on the basis of the site’s presentation alone.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about aviorinternational.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
