Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2009.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is an established German e-commerce marketplace through which independent merchants offer sustainable fashion, household, beauty, children's, and lifestyle products, supported by product pricing, sustainability criteria, editorial material, customer-service resources, and account and shopping functions.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, malicious reputation findings, or deceptive financial features were observed. The homepage presents a coherent retail model with named brands, visible prices and discounts, and clearly identified sponsored placements. Its long-established domain, substantial historical continuity, recognized traffic footprint, and clean external threat reputation strongly support the conclusion that this is the authentic marketplace rather than a recently created imitation.

- The homepage showed no hidden forms, external password forms, wallet interactions, clipboard manipulation, suspicious inline scripts, or cloaking.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing classification, and no abuse reports; the domain ranks 59,278 in the global traffic dataset.
- The domain was registered in 2009 and is approximately 16.81 years old.
- The web archive contains 1,887 snapshots spanning 2009–2026, representing 18 tracked years with no gap longer than one year and no detected repurposing.

Regulatory Verification Notes

The observed business model is conventional marketplace retail rather than a regulated financial, investment, or brokerage service. The homepage provides merchant disclosures, customer-support links, legal terms, privacy information, and an imprint, which are appropriate trust and accountability mechanisms for this type of operation. No financial-services licence is claimed, and the supplied evidence does not establish a licensing requirement. The specific legal-entity particulars contained in the imprint were not included in the evidence, so no representation is made concerning corporate registration details.

- The homepage identifies the service as an e-commerce marketplace and exposes links to an imprint, legal terms, privacy information, and customer support.
- Product pages and marketplace navigation distinguish independent brands and merchants, while commercial promotions are labelled as sponsored placements.
- The hosting infrastructure serves the site from AS13335 (Cloudflare, Inc., US).

- The site's transport encryption uses a WE1-issued domain-validated TLS certificate, valid until 2026-10-14.

What to Verify Next

For institutional onboarding or material procurement, the legal entity and address stated in the imprint should be matched against the applicable corporate register. Merchant identity, returns terms, delivery conditions, and payment protections should be reviewed for the particular seller involved, because marketplace transaction performance can depend on the independent merchant. Official customer-service channels may also be confirmed through the site's published legal and support pages before initiating a contractual escalation.

- The imprint and legal-policy links provide the appropriate starting points for confirming the marketplace operator's contracting identity.
- The homepage indicates that products are supplied through multiple independent merchants, making seller-specific checks relevant to individual purchases.
- Customer-support and account facilities are presented as integrated parts of the marketplace rather than redirects to unrelated domains.

Summary Verdict

The website is legitimate, established, and trustworthy. Its identity, operating model, historical provenance, external reputation, and observed browser behaviour converge without material inconsistency, supporting normal consumer and business interaction with high confidence.

Infrastructure Integrity

The site is protected by Cloudflare's CDN and WAF, with all four observed IPv4 and IPv6 addresses operating as edge nodes. The origin server was consequently not exposed during the assessment; this is a normal protective configuration that reduces direct infrastructure exposure but is not, by itself, evidence of legitimacy.

Closing Assessment

Normal browsing, account login, and standard marketplace transactions are appropriate, with routine seller and purchase-term due diligence proportionate to the value of the transaction.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [avocadostore.de](#).

- The request stayed on [avocadostore.de](#). It was not redirected to another domain. CLEAR
- DNS for this domain is served by [cloudflare.com](#), across 2 name servers. NOTED
- The earliest public archive of this site is from 2009-10-10. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [avocadostore.de](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
