

Is avpdisplay.com a scam? TrustSniffer's high-risk assessment: 0/100

avpdisplay.com

Verdict

0

OUT OF 100

CRITICAL RISK

avpdisplay.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Local Mexican audiovisual company (AVP) offering LED screen rental and event display services. Contains company information, service descriptions, gallery, contact details (phone, email, physical address) and a contact form.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://avpdisplay.com/>

What avpdisplay.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

AVP is a Mexican audiovisual-services website presenting LED screen rental and event-display solutions for agencies, companies, concerts, and other events. Its visitor-facing model is a regional corporate service business featuring outdoor, indoor, sports, and mobile LED screens, supported by company information, a project gallery, contact details, and a lead-generation form.

Scam/Impersonation Risk

The site presents a coherent corporate-service profile rather than a phishing or financial-scheme interface: no login form, password collection, wallet connection, crypto functionality, or hidden sensitive form was detected, and the page-level content review identified no intrinsic fraud indicators. However, this benign presentation is outweighed by a confirmed blacklist signal and multiple external malicious detections, including four malicious determinations and one suspicious determination in the evaluated reputation data. These findings constitute a material contradiction to the site's otherwise ordinary appearance; the available evidence does not establish that the site is impersonating a named brand, but it does support a high-risk posture for sensitive interactions.

EVIDENCE

- The homepage identifies AVP as a Mexican LED-screen rental and audiovisual-services company and lists outdoor, indoor, sports, and mobile display services.
- The homepage contains one contact form classified as a non-sensitive contact form; no login form, hidden form, wallet connection, or password-external submission was detected.
- External reputation checks recorded 4 malicious and 1 suspicious detections, with Kaspersky among the flagged vendors; a confirmed blacklist hit was recorded by two external sources.
- Domain registration: 2018-09-25T22:13:12Z; age 7.91 years; registrar Neubox Internet S.A. de C.V.

Regulatory Verification Notes

The available pages describe a commercial audiovisual provider and provide company, service, contact, and location information, but no licensing or registration number is claimed in the supplied site content. For this type of service, that omission is a verification matter rather than independent evidence of fraud. The site's real-world operator remains unverified, so the on-page AVP presentation should not be treated as proof of a legally established entity. The external broker-reputation dataset contains no matching record; that absence does not resolve the separate malicious-detection and blacklist concerns.

EVIDENCE

- The homepage's "About" content states that AVP has provided audiovisual solutions since 2012 and serves communication agencies, companies, and mass concerts.
- The homepage provides service descriptions, a gallery, contact details, and a contact form, but the supplied content contains no license authority or registration number.
- Hosting infrastructure resolved to AS54641, IMH-IAD – InMotion Hosting, Inc., US.
- TLS uses a DV certificate issued by YR1, valid through 2026-10-19T05:26:06+00:00.

What to Verify Next

Before any contract, payment, site-provided document exchange, or other sensitive interaction, the prospective counterparty should independently confirm AVP's legal entity and physical operations through Mexican corporate and tax records, validate the contracting party on quotations and invoices, and confirm the relevant contact channels through an independently sourced telephone number or offline business reference. Any payment should use a method offering dispute and recovery protections, and supplied banking details should be confirmed through a separate communication channel.

EVIDENCE

- The homepage describes direct service contracting with agencies, companies, and concert organizers as the apparent commercial pathway.
- The site offers a contact form rather than an account or credential workflow.
- The technical page capture returned HTTP status 200 in 2 of 2 successful runs, while behavioral analysis recorded 5 console errors and a maximum post-interaction DOM difference of 24.

Summary Verdict

The overall posture is **critical trust risk**. Although the website's content and interface are consistent with a conventional audiovisual-services business, the confirmed blacklist status and malicious external detections are decisive contradictions, and the operator's identity is not independently verified. Sensitive interaction should therefore be treated as inappropriate absent strong independent validation.

Infrastructure Integrity

The site resolves directly to a likely origin address hosted by InMotion Hosting, Inc. on AS54641 in the United States, with no CDN or WAF detected. Its valid DV TLS certificate provides transport encryption, but hosting and certificate controls are mitigating technical measures only and do not offset the external reputation findings.

Closing Assessment

The site should be treated as unsuitable for credentials, financial transactions, or exchange of sensitive business information until independent legal, operational, and payment-channel validation is completed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of avpdisplay.com.

- The request stayed on avpdisplay.com. It was not redirected to another domain. CLEAR
- Registration is published under Neubox Internet S.A. de C.V.. CLEAR
- DNS for this domain is served by websensemx.com, across 2 name servers. NOTED
- The registration is paid up to 2026-09-25. NOTED
- The earliest public archive of this site is from 2021-11-26. CLEAR
- It is hosted on IMH-IAD, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about avpdisplay.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
