Full analysis

Overview

The website is Axis, a B2B programmatic advertising marketplace and adtech infrastructure platform serving publishers, buyers, agencies, and technology partners across web, in-app, CTV, video, and audio environments through offerings including Pubcircle, Axis Exchange, and Axis DSP.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand-impersonation signals, or confirmed malicious reputation findings were observed. The homepage presents a coherent corporate advertising business model, uses professional service descriptions, and provides a business inquiry pathway rather than a suspicious credential-collection flow. Its sustained historical presence and clean external reputation support an established identity.

- The homepage presents a corporate B2B advertising platform with no reported red flags or impersonation indicators.
- The domain was registered on 2022-09-29 and is approximately 3.84 years old.
- The domain has 168 archive snapshots across 4 tracked years, from 2023-04-01 to 2026-07-10.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist hit.

Regulatory Verification Notes

Axis presents legal links, company contact information, and a clearly defined commercial service model. No specific regulatory license or registration number is claimed in the supplied site content; for an advertising-technology provider, this is a transparency and contractual verification matter rather than evidence of deception. Registration privacy is an administrative detail, while the established traffic footprint, known registrar, valid TLS, and stable technical operation support the site's legitimacy.

- The domain registrar is GoDaddy.com, LLC, with registration through Domains By Proxy, LLC.
- The site is hosted on AS46636, NATCOWEB - NatCoWeb Corp., US.
- TLS uses a DV certificate issued by Go Daddy Secure Certificate Authority - G2, valid to 2026-09-01.
- The homepage contains legal links and a business inquiry form with company contact information.

What to Verify Next

Before a formal commercial engagement, the prospective counterparty should confirm the contracting entity, applicable advertising and data-processing obligations, and the service terms through the site's legal materials and an independently validated business channel.

- The homepage provides legal links relevant to contractual and disclosure review.
- The homepage provides a business inquiry form for confirming commercial contacts and engagement details.

Summary Verdict

Axis presents as a legitimate, established, and trustworthy corporate website with a coherent business purpose and no observed scam or impersonation contradictions. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site resolves directly to a single likely origin hosted by NATCOWEB in the United States, with no CDN edge layer identified. The resolved infrastructure has a trusted protective posture, which provides a mitigating technical signal but is not, by itself, proof of legitimacy.

Closing Assessment

Standard browsing, login, account actions, and ordinary business engagement are appropriate, subject to normal commercial and contractual due diligence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about axis-marketplace.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
