Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

This is an established retail and corporate banking website presenting personal, business, NRI, private, agricultural, card, remittance, lending, deposit, and digital-banking services, with account-opening and internet-banking access intended to support ordinary banking relationships and transactions.

Scam/Impersonation Risk

No contradictions were observed across the site's banking content, login pathways, and technical reputation signals. The homepage presents coherent banking services and product information, while external checks found no malicious, suspicious, phishing, impersonation, or blacklist indicators. Normal interaction, including account login, is appropriate.

- The homepage identifies personal, business, NRI, corporate, card, remittance, deposit, loan, and digital-banking services.
- The homepage provides internet-banking login and account-opening functions without an untrusted form destination.
- The domain was registered on 2005-02-17 and is approximately 21.47 years old.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist hit.

Regulatory Verification Notes

The site presents a banking business model involving deposits, fixed deposits, loans, cards, remittances, and associated fees and interest margins. The supplied page evidence does not establish a specific license number or regulator disclosure; this is a limited transparency item requiring ordinary regulatory confirmation, not evidence of deception. No broker-dataset match was identified.

- The homepage describes retail and corporate banking services, including deposits, loans, cards, remittances, and digital banking.
- Domain registration identifies National Internet Exchange of India as registrar and NIXI as the organization.
- The site is hosted on AS4755, TATACOMM-AS – TATA Communications formerly VSNL is Leading ISP, IN.
- Transport encryption uses an OV certificate issued by DigiCert Global G2 TLS RSA SHA256 2020 CA1 for Axis Bank Limited, valid through 2026-12-14.

What to Verify Next

Confirm the applicable banking authorization and legal entity details through the relevant official registry or institutional channel. For high-value arrangements, independently confirm product terms, account-opening procedures, and official support routes using contact information obtained through an established offline or independently verified channel.

- The homepage contains account-opening and login entry points.
- The homepage identifies multiple consumer, corporate, and NRI banking service categories.
- The terms, privacy, and legal-information pages should be checked for the responsible entity and applicable authorization disclosures.

Summary Verdict

The website presents as a legitimate, established, and trustworthy banking platform with coherent service content, a clean external reputation, and no observed impersonation or phishing contradictions. Its overall posture supports normal account access and standard banking use.

Infrastructure Integrity

The site resolves directly to infrastructure associated with AS4755 and TATA Communications in India, without a detected CDN or WAF layer. Its OV DigiCert certificate provides a meaningful transport-integrity control and identifies Axis Bank Limited; the hosting arrangement is a mitigating technical signal, not independent proof of legitimacy.

Closing Assessment

Standard interaction is appropriate, with regulatory and product disclosures confirmed through official institutional channels before entering into materially significant arrangements.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of axis.bank.in.

- The request stayed on axis.bank.in. It was not redirected to another domain. CLEAR
- Registration is published under National Internet Exchange of India. CLEAR
- DNS for this domain is served by trs-dns.com, across 4 name servers. NOTED
- The registration is paid up to 2027-02-17. NOTED
- It is hosted on TATACOMM-AS, from a server in IN. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about axis.bank.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
