Full analysis

Overview

This website is a small Colombian commercial catalogue for AYM INTERNACIONAL DE COMERCIO SAS, presenting food products such as jamón and chorizo and directing prospective customers toward contact-based orders through telephone, email, and Facebook and Instagram profiles rather than an integrated checkout.

Scam/Impersonation Risk

The site does not display an apparent brand-impersonation pattern, login form, hidden sensitive form, or other phishing mechanism in the reviewed page content. However, the domain has been identified by multiple external reputation sources as blacklisted, with malicious detections recorded, and this is the decisive contradiction driving the elevated risk posture. The site's ordinary catalogue presentation and stable browser behavior do not offset that external threat signal.

EVIDENCE

- The homepage presents a local business catalogue and contains no login form, password form, hidden form, or wallet-related interaction.
- External reputation evaluation recorded 4 malicious detections and a confirmed blacklist across multiple sources.
- Historical domain records run from 2011-02-01 through 2025-04-04, spanning 15 years; the archive-reconciled domain age is 15.550992470910336 years.

Regulatory Verification Notes

The “Nosotros,” “Productos,” and “Contacto” content identifies the business as AYM INTERNACIONAL DE COMERCIO SAS and describes direct commercial sales of food products. The reviewed material does not state a licensing authority or registration number, and the available disclosure is therefore insufficient for independent regulatory confirmation; this is a verification gap rather than, by itself, evidence of fraud. The site appears to have a likely connection to a real-world business through its social profiles, but that connection is not independently verified.

EVIDENCE

- The homepage title identifies “AYM INTERNACIONAL DE COMERCIO SAS - Inicio,” while the site navigation includes “Nosotros,” “Productos,” and “Contacto.”
- The reviewed pages do not present a licensing authority or license number.
- The site is served on AS47583 by AS-HOSTINGER - Hostinger International Limited, CY.
- TLS uses issuer YE1 with DV validation and is valid to 2026-11-05T09:14:52+00:00.

What to Verify Next

Before any commercial engagement, an independent check should confirm that the named Colombian business exists in the relevant corporate registry and that its telephone, social profiles, and trading activity correspond to the same entity. Payment arrangements should be limited to methods offering meaningful dispute and buyer protection, with order terms, delivery commitments, and refund conditions obtained in writing. Official contact channels should also be confirmed through an independent route before sensitive information or payment details are exchanged.

EVIDENCE

- The “Contacto” page supplies the business contact channels that should be matched against an independent corporate or commercial record.
- The “Productos” and catalogue pages describe the goods offered but do not provide an integrated checkout, written order terms, or refund workflow.
- The site's social links provide additional business identifiers for cross-checking against independently sourced records.

Summary Verdict

The website warrants a **low-trust, sensitive-interaction-risk posture**. Although its presentation is consistent with a small local retailer and its apparent business connection is plausible, the confirmed external reputation contradiction materially outweighs those benign page-level characteristics. Real-world operator identity and legitimacy should therefore be treated as unproven.

Infrastructure Integrity

The site uses Hostinger International Limited infrastructure on a directly resolved hosting setup, with no CDN detected and likely origin addresses exposed by DNS resolution. A valid DV TLS certificate provides transport encryption, but it does not establish the operator’s identity or neutralize the external reputation concern.

Closing Assessment

Prospective users should limit activity to passive viewing and defer login, credential submission, or financial transactions until the business and its contact channels have been independently validated.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ayminternacional.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
