Full analysis

Overview

Ayo Printing Bali is a local commercial printing website serving customers in Denpasar, Bali, with an apparent business model based on digital and offset printing, promotional materials, merchandise, customer orders, and in-person or online inquiries.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent local-business model covering banners, baliho, stickers, mugs, stamps, brochures, business cards, name tags, member cards, and related promotional printing, with no detected phishing, brand-impersonation, cryptocurrency, wallet, or sensitive-login behavior. External reporting is a soft reputational signal concerning the shared hosting infrastructure rather than evidence that Ayo Printing Bali itself is abusive; the attribution expressly applies those reports to a shared provider IP. The site's established registration continuity and consistent historical business presentation further support an apparently genuine operating presence, although they do not independently prove the real-world operator's identity.

EVIDENCE

- The homepage identifies Ayo Printing Bali as a Denpasar printing business and lists digital outdoor, digital indoor, and offset-printing services; no page-level red flags were recorded.
- Registration evidence records creation on 2018-07-03 and an age of 8.14 years; archived coverage records 62 snapshots from 2019 through 2026 across 8 years.
- The hosting IP has 34 abuse reports, attributed to shared infrastructure operated by WHG Hosting Services Ltd rather than specifically to the website.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate local service provider, but identity verification remains likely rather than conclusive. The About, Contact, and ordering pages provide a business name, physical location, customer-contact routes, and links to Facebook, Instagram, and YouTube; the registration record separately associates the domain with Dewa De and Ayo Printing through CV. Jogjacamp. No licensing claim or registration number was presented in the reviewed pages. For a print shop, that omission is a disclosure and verification point rather than evidence of a scam, and no separate broker-reputation match was identified.

EVIDENCE

- The About and Contact pages describe Ayo Printing Bali as a Denpasar-based printing business and provide a physical address and social-media presence.
- Domain registration records list registrar CV. Jogjacamp, registrant Dewa De, and organization Ayo Printing.
- The reviewed business and legal-content pages contain no stated license authority or license number.

What to Verify Next

Before a high-value order or advance payment, the counterparty should be confirmed through an independently sourced business address or telephone route, and the quotation, production specifications, delivery terms, refund conditions, and payment recipient should be matched against the written order documentation. Any applicable Indonesian business-registration or consumer-protection requirements should also be checked with the relevant official authority. For sensitive account activity, contact channels should be confirmed through an independent offline route rather than relying solely on website-provided details.

EVIDENCE

- The site's ordering instructions describe customer inquiries and order placement as the primary transaction path.
- The site contains no sensitive web form or login form, so material transactions are expected to proceed through external communication or in-person interaction.
- The reviewed site is a WordPress-based local-services website with stable successful page loads and no observed cloaking or hidden-form behavior.

Summary Verdict

The website has a **moderate-trust posture** and appears consistent with a genuine local printing business, with no observed scam or impersonation contradiction. Its legitimacy is supported by coherent commercial content and sustained domain presence, but the available evidence does not independently verify the real-world operator sufficiently to support an unconditional high-value engagement decision.

Infrastructure Integrity

The site resolves directly to hosting operated by WHG-SGP / WHG Hosting Services Ltd in Great Britain, with no detected CDN or WAF layer and one likely origin address. Transport encryption is present through a domain-validated certificate issued by YR2; this protects the connection but does not authenticate the business entity. The direct hosting arrangement is therefore a neutral infrastructure characteristic rather than proof of legitimacy.

EVIDENCE

- Served from AS204800 (WHG-SGP - WHG Hosting Services Ltd, GB).
- TLS certificate issued by YR2 with DV validation, valid to 2026-10-01T01:22:45+00:00.
- Infrastructure resolution identifies 1 unique IP, 0 edge IPs, and 1 likely origin IP; no CDN was detected.

Closing Assessment

Ordinary informational use is reasonable, while independent confirmation of the counterparty, order terms, and payment protections should precede high-value or sensitive actions.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ayoprintingbali.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
