

Is ayyanarmetals.com safe? TrustSniffer's moderate-trust assessment: 65/100

ayyanarmetals.com

Verdict

65

OUT OF 100

MODERATE TRUST

ayyanarmetals.com is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Governance Risk

Dynamic Interaction Caution

Assessed 2026-08-21 by automated analysis. Classification confidence 70%.

What this site appears to be

A product/catalog website for Ayyanar Metal House describing company history, product categories (kitchen equipment, racks, sinks, trolleys), and showcasing gallery/projects. Appears informational and aimed at lead generation or sales; no forms or payment flows present in the captured content.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Governance Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2011.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Ayyanar Metal House is an informational product-catalogue website for a local metal and brass-products manufacturer and seller. It presents kitchen equipment, tables and racks, kitchen sinks, display equipment, trolleys, company history, and project-gallery material, with an apparent purpose of generating product enquiries or direct sales rather than processing transactions online.

Scam/Impersonation Risk

No blacklist, phishing, brand-impersonation, or conflicting-identity signals were observed. The site's content is consistent with a small commercial manufacturer: it identifies itself as Ayyanar Metal House, describes brass craftsmanship and a claimed history beginning in 1979 under the name Annapoorna Brass, and provides product and gallery material without login, payment, wallet-connection, or sensitive-data forms. Dynamic testing recorded two suspicious inline scripts, but also recorded no external network activity, no hidden forms, no password submissions, no wallet activity, and no cloaking; this is a limited technical anomaly rather than evidence of impersonation or fraud. The available evidence therefore supports a cautious, moderate-risk interpretation, while the real-world operator remains unverified.

EVIDENCE

- The homepage and About material identify “Ayyanar Metal House” and describe its claimed founding in 1979 by Mr. P. Thangeswaran.
- The captured site behavior recorded 2 suspicious inline scripts, 0 external XHR/fetch requests, 0 hidden forms, and 0 password-external-form submissions.
- The domain was registered on 2019-03-18 and is approximately 7.43 years old.
- Historical records show 360 archive snapshots spanning 2011–2026, covering 16 tracked years.

Regulatory Verification Notes

The site presents a conventional manufacturing and catalogue business rather than a regulated financial service. Its About and product pages provide a business name, founder narrative, product categories, and project examples, but the captured pages do not provide a corporate registration number, trade licence, or other independently verifiable legal-entity identifier. That is a disclosure and verification matter, not a scam indicator. The registration record uses GoDaddy.com, LLC, and the site’s published content contains no regulated-product or licensing claim. The absence of a matched third-party broker signal and the lack of recorded malicious or suspicious detections are supportive contextual signals, although external reputation coverage is partial.

EVIDENCE

- The About page states that the business was founded in 1979 and describes its location and brass-product trade.
- The homepage and product pages identify the business as a manufacturer or seller of kitchen equipment, racks, sinks, display equipment, and trolleys.
- The domain registration record lists GoDaddy.com, LLC as registrar, with creation date 2019-03-18 and expiration date 2027-03-18.
- The site’s transport encryption uses a DV certificate issued by YR2, valid through 2026-10-30.

What to Verify Next

Before a high-value purchase or sensitive commercial commitment, the prospective counterparty should independently confirm the business’s legal trading name, physical operating details, applicable local registration, quotation and invoicing information, warranty terms, and returns or delivery conditions. Payment arrangements should use a method providing appropriate commercial recourse, and contact channels should be confirmed through an independent route before funds or sensitive documents are exchanged.

EVIDENCE

- The Contact page is presented as the site’s enquiry channel, while the captured content contains no payment form.
- The site contains product, gallery, About, and Contact sections but no captured licensing or registration disclosure.
- The product and project pages provide the commercial context needed to compare any quotation or invoice with the advertised business activity.

Summary Verdict

The website has a **moderate trust posture**: its business presentation, sustained historical presence, ordinary product-catalogue model, and absence of observed scam or impersonation contradictions are consistent with an apparently legitimate small commercial site. Confidence is limited because the operator’s real-world identity is not independently verified, so the site should not be treated as fully authenticated for high-value commitments.

Infrastructure Integrity

The site resolves directly to hosting operated by WHG-IN — WHG Hosting Services Ltd in Great Britain, without a detected CDN or WAF edge layer. Direct hosting is not inherently adverse; the resolved infrastructure is identifiable, and the site uses valid transport encryption. This provides baseline connection protection but does not independently establish the operator’s legitimacy.

Closing Assessment

Normal browsing and product research are reasonable, but high-value purchases, advance payments, and sensitive business exchanges should proceed only after the commercial counterparty and transaction protections have been independently confirmed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, behaviour in a sandbox.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Dynamic Interaction Caution

- The page carried inline scripts written in a style TrustSniffer treats as suspicious.

Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ayyanarmetals.com.

- The request stayed on ayyanarmetals.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by mysecurecloudhost.com, across 4 name servers. NOTED
- The registration is paid up to 2027-03-18. NOTED
- The earliest public archive of this site is from 2011-02-01. CLEAR
- It is hosted on WHG-IN, from a server in GB. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ayyanarmetals.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
