

Is azhcollections.com a scam? TrustSniffer's high-risk assessment: 0/100

azhcollections.com

Verdict

0
OUT OF 100

CRITICAL RISK

azhcollections.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be	Small Pakistani online clothing store (AZH Collections) with product listings, prices in PKR, contact email/phone, social links and promotional banners. Appears to be a typical shop theme; no explicit investment, credential harvesting, or crypto activity present in visible content.
------------------------------	--

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

https://azhcollections.com/

What azhcollections.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Google, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is AZH Collections, a small Pakistani online retail storefront offering women's, men's, and children's clothing, accessories, shoes, watches, and related products priced in Pakistani rupees. Its apparent business model is conventional e-commerce, using product listings, promotional sales, a shopping cart, and customer-support contact details to facilitate clothing sales and order fulfilment.

Scam/Impersonation Risk

No conflicting legal-entity names or visible brand-impersonation indicators were observed in the page content. Nevertheless, the domain has a confirmed **blacklist** hit and multiple malicious detections from external security services, including a malicious Safe Browsing result; these are direct contradictions to the otherwise ordinary storefront presentation and create a material risk for sensitive interaction. A separate abuse-report signal concerns a shared data-centre IP operated by Limestone Networks and carries no provider confidence, so it is not treated as site-specific attribution. The website's conventional retail appearance and absence of visible credential-harvesting features do not offset the confirmed external threat detections.

EVIDENCE

- The domain registration record shows creation on 2026-04-21 and an age of 0.33 years.
- External security checks recorded 14 malicious detections and 1 suspicious detection, with a confirmed blacklist hit.
- Abuse reports concern IP address 64.31.22.34, attributed to shared infrastructure operated by Limestone Networks, Inc., with 15 reports and a confidence score of 0.

Regulatory Verification Notes

The available pages present the AZH Collections trading name and provide About and Contact navigation, but the available content does not show a licensing or registration number. For an online clothing retailer, this is a merchant-identity and disclosure gap rather than proof of fraud; however, the absence of independently verified regulatory information leaves the operator's real-world identity only likely rather than established. The valid transport certificate and identified hosting arrangement demonstrate technical operation, not legal authorization or commercial reliability.

EVIDENCE

- The storefront identifies itself as "AZH Collections" and exposes About and Contact pages in its primary navigation; no license or registration number is shown in the available page content.
- The registration record identifies Hello Internet Corp as registrar.
- The site is hosted on AS46475, Limestone Networks, Inc., US.
- TLS is issued by YR1 at DV validation level and is valid to 2026-09-19T18:55:39+00:00.

What to Verify Next

Before any commercial engagement, an independent check should confirm the legal entity operating the store, its physical business presence, and the applicability of local retail or e-commerce registration requirements. The return, refund, delivery, and dispute terms should be obtained and reviewed, and any payment route should be confirmed to provide established buyer protection without unexpected redirection. Official contact channels should also be confirmed through an independent route rather than relying solely on information presented on the site.

EVIDENCE

- About page: confirm the operator's full legal name, business address, and responsible entity.
- Contact page: independently validate the published contact channels and their connection to the stated business.
- Shopping and checkout flow: confirm final pricing, fulfilment terms, refund procedures, and payment-protection options before an order is placed.

Summary Verdict

The overall posture is critical, with sensitive interaction risk driven by confirmed external threat contradictions. The site may represent a real small retailer, but the available evidence does not support treating it as an established or safe destination for credentials, payment information, or other sensitive data.

Infrastructure Integrity

CDN/WAF protection is present, with observed edge servers on AS16509 and a potential origin candidate. This architecture can reduce direct exposure of the hosting environment, but it is only a mitigating control and does not establish the legitimacy of the operator or overcome the external reputation findings.

Closing Assessment

Sensitive interactions should not proceed unless the operator’s identity, commercial terms, and payment protections have first been confirmed through trusted independent channels.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 15 reports on hosting IP 64.31.22.34 (Limestone Networks, Inc., Data Center/Web Hosting/Transit), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of azhcollections.com.

- The request stayed on azhcollections.com. It was not redirected to another domain. CLEAR
- Registration is published under Hello Internet Corp. CLEAR
- DNS for this domain is served by hosterpk.com, across 2 name servers. NOTED
- The registration is paid up to 2027-04-21. NOTED
- The earliest public archive of this site is from 2021-11-26. CLEAR
- It is hosted on LIMESTONENETWORKS, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about azhcollections.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
