- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2016.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the corporate online service portal for Azul Logística, a Brazilian freight and logistics business associated with Azul Linhas Aéreas, serving individuals and businesses that require domestic or international shipment services.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, malicious-content, or conflicting-identity evidence was observed. The homepage provides coherent freight quotations, shipment tracking, location search, customer-account functions, e-commerce integration, and partnership information consistent with its stated logistics model. Its long-established domain, continuous archival footprint, recognized traffic presence, and clean external reputation strongly support authenticity rather than a recently created or repurposed operation.

- The domain record shows registration on 5 October 2016 (~9.84 years old), with Azul IP Cayman Ltd. recorded as owner and expiry on 5 October 2027.
- The domain has 176 archive snapshots spanning 28 November 2016–9 November 2025 (10 years tracked), with no suspicious repurposing or semantic drift identified.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no phishing indication, no abuse reports, and no signature matches.
- The domain holds a global traffic rank of 152,036 and is within the top one million websites.

Regulatory Verification Notes

The homepage presents an identifiable corporate operation and discloses corporate registration, physical address, tax, telephone, policy, investor-relations, and institutional information. No license claim or license number appears in the supplied content; however, the business presented is freight transportation rather than a financial or investment service, and the absence of a financial-services license is therefore not an adverse indicator. The organization-validated certificate names Azul Linhas AEREAS Brasileiras S.A., providing additional technical corroboration of the Azul corporate association.

- The homepage identifies the service as Azul Logística and provides institutional, policy, investor-relations, shipping-conditions, and customer-support sections.
- The homepage discloses corporate registration, address, tax, and telephone details alongside domestic and international logistics information.

- The site's TLS certificate was issued by DigiCert Global G3 TLS ECC SHA384 2020 CA1 to Azul Linhas AEREAS Brasileiras S.A.; validation is OV and the certificate is valid to 21 October 2026.
- No financial product, cryptocurrency activity, broker profile, or investment-service claim was identified on the assessed homepage.

What to Verify Next

For material commercial engagements, contracting teams should reconcile the legal entity named in the applicable service conditions and invoice documentation with the entity receiving payment. Shipment instructions, collection locations, insurance terms, prohibited-goods rules, and liability limits should be confirmed through the site's published operational documents. Official contact channels should also be independently confirmed before establishing a new enterprise integration or transportation partnership.

- The homepage provides access to General Conditions and Shipping Instructions relevant to contractual and operational due diligence.
- Store-search and shipment-tracking functions offer transaction-specific means to validate collection points and consignments.
- The site provides representative, carrier, and e-commerce integration pathways that may create separate contractual relationships.
- Customer-account areas include company profiles, shipment records, issuance history, and invoices, making entity and billing reconciliation appropriate for enterprise onboarding.

Summary Verdict

The website is a legitimate, established, and trustworthy corporate logistics portal. Its identity, operating purpose, historical continuity, technical authentication, and external reputation converge without material contradiction, supporting normal interaction, including account login and standard use.

Infrastructure Integrity

The website is served through Akamai's CDN/WAF, and all four observed addresses were edge systems rather than origin candidates. This arrangement reduces direct exposure of the origin environment and is a sound protective control, although infrastructure protection is corroborative rather than standalone proof of legitimacy.

- The hosting infrastructure serves the site from AS20940 (Akamai International B.V., Netherlands).
- Four CDN edge addresses were observed across AS20940 and AS1299; no origin-server candidate was exposed during the assessment.

Closing Assessment

Prospective users may use the site normally, while organizations entering material logistics contracts should apply their standard counterparty, payment, and contractual onboarding controls.

Written analysis generated 2026-08-04 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
--------	------------

Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of azulcargoexpress.com.br.

- The request for azulcargoexpress.com.br ended on www.azullogistica.com.br, a different domain. **WATCH**
- DNS for this domain is served by akam.net, across 6 name servers. **NOTED**
- The registration is paid up to 2027-10-05. **CLEAR**
- The earliest public archive of this site is from 2016-11-28. **CLEAR**
- It is hosted on AKAMAI-ASN1, from a server in NL. **NOTED**

About this assessment

A trust score summarises the evidence TrustSniffer could collect about azulcargoexpress.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
