## The page as captured

<https://babyloninternational.com/>

What babyloninternational.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

## Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2011.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

## Full analysis

### Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website presents BABYLON as a corporate B2B supplier serving the denim and textile industry, offering sustainable denim washing and garment-dye solutions, textile chemicals, automation equipment, digital inspection, wastewater treatment, ERP solutions, and consultancy, with sales and support apparently conducted through quote requests and business contact forms.

### Scam/Impersonation Risk

The site has a **critical sensitive-interaction risk posture** because the domain is subject to a confirmed blacklist signal and multiple external security detections, including 11 malicious and 1 suspicious detection. This is a material contradiction that outweighs the otherwise conventional corporate presentation. The available page analysis did not identify a login form, credential-harvesting mechanism, brand impersonation, or conflicting legal identities; the concern is therefore driven by the external threat reputation rather than an observed identity contradiction on the supplied pages. Sensitive actions, including credential submission, financial transactions, or reliance on the site for commercial onboarding, should not proceed on the present evidence.

#### EVIDENCE

- External reputation telemetry recorded 11 malicious detections and 1 suspicious detection across evaluated security sources.
- The domain was identified as blacklisted by two external sources.
- The homepage presents a corporate textile-equipment business and contains one contact form, with no login or password form detected.
- Domain registration telemetry records creation on 2019-07-13, approximately 7.11 years ago.

#### Regulatory Verification Notes

The available Company, Products, Contact, and homepage content describes industrial equipment, chemicals, automation, consultancy, and related services but does not state a licensing authority or registration number. This is a regulatory disclosure gap requiring independent confirmation before a commercial relationship; it is not, by itself, proof of fraudulent activity. The site's apparent business identity is not independently verified by the supplied evidence, and the absence of a matching broker-context record provides no licensing conclusion.

#### EVIDENCE

- The homepage and Company content identify BABYLON and describe textile-industry products and services, but no applicable license authority or license number is presented in the supplied content.
- The domain is registered through GoDaddy.com, LLC.
- The site is hosted on AS47583, identified as AS-HOSTINGER — Hostinger International Limited, CY.
- TLS telemetry shows issuer YE2, Domain Validation (DV), valid to 2026-09-29T02:21:25+00:00.

#### What to Verify Next

Before any commercial engagement, an independent party should confirm the operating legal entity, physical business details, and any permits or registrations applicable to the machinery, chemical, wastewater-treatment, and consultancy services through authoritative registries or an independently sourced corporate contact. Contact details should also be validated through an offline or independently obtained channel, and any quotation, invoice, payment instruction, or document download should be checked for consistency with the verified entity.

#### EVIDENCE

- The Contact page provides a business contact form with subjects including partnership, support, technical assistance, and requests for proposal.
- The homepage links to Facebook, LinkedIn, and Instagram, providing potential channels for independent business-presence corroboration.
- The site's supplied page content contains no sensitive login form, hidden form, or untrusted form destination.

#### Summary Verdict

The overall posture is critical and unsuitable for sensitive interaction. The site has a plausible corporate B2B presentation, but the confirmed external threat contradiction controls the assessment and prevents the website

from being treated as trustworthy for credentials, financial activity, or consequential business reliance.

Infrastructure Integrity

The site is not shown as operating behind a detected CDN, with no edge IPs identified and two likely origin IP candidates. Its infrastructure resolves to Hostinger International Limited in Ukraine; this is a hosting fact rather than evidence of operator legitimacy, and the available protective infrastructure does not mitigate the external reputation concern.

Closing Assessment

Prospective users should restrict activity to non-sensitive review and independently validate the counterparty before any login, credential exchange, payment, document transfer, or contractual commitment.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

  - The registration record withholds contact details for the operator.  
Registration and ownership rule:KF\_WHOIS\_HIDDEN
  - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.  
Registration and ownership rule:KF\_WHOIS\_PRIVATE
- 02 Sensitive Interaction Risk

  - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.  
Analysis engine signal:direct\_threat
  - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.  
External reputation rule:EXT\_BLACKLIST\_CRITICAL

Identity verification

|                                  |        |
|----------------------------------|--------|
| Status                           | LIKELY |
| Identity score                   | 79/100 |
| Identity verification confidence | 39%    |

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of babyloninternational.com.

- The request stayed on babyloninternational.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2030-07-13. CLEAR
- The earliest public archive of this site is from 2011-02-01. CLEAR
- It is hosted on AS-HOSTINGER, from a server in UA. NOTED

### About this assessment

A trust score summarises the evidence TrustSniffer could collect about babyloninternational.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
