

Is backmarket.es legit? TrustSniffer's high-trust assessment: 100/100

backmarket.es

Verdict

100

OUT OF 100

HIGH TRUST

backmarket.es appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-03 by automated analysis. Classification confidence 75%.

What this site appears to be

Spanish Back Market homepage offering refurbished phones, computers, tablets, consoles, appliances, and accessories. It provides itemized pricing, ratings, cart actions, a two-year warranty, a 30-day trial, trade-ins, repairs, insurance, installment payments, support resources, editorial content, and an email newsletter.

Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2016.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is the Spanish storefront of Back Market, an established e-commerce marketplace connecting customers with professional refurbishers of phones, computers, tablets, consoles, appliances, and accessories, while also presenting trade-in, repair, insurance, instalment-payment, and related support services.

Scam/Impersonation Risk

No identity contradictions, impersonation indicators, phishing behaviour, or malicious reputation findings were observed. The homepage presents a coherent retail journey with itemised prices, ratings, cart functions, customer-service resources, and defined consumer protections. Its long-standing, continuous web presence and established global traffic footprint materially support the conclusion that this is a legitimate marketplace rather than a recently created imitation.

- The homepage showed no hidden forms, external password submission, cloaking, clipboard manipulation, cryptocurrency-wallet interaction, or suspicious inline scripts.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no phishing or other high-priority threat finding.
- The domain was registered in 2016 and is approximately 10.5 years old.
- The web archive contains 373 snapshots from 2016-01-28 through 2022-06-07, covering 7 tracked years without evidence of suspicious repurposing.

Regulatory Verification Notes

The observed storefront is a conventional retail marketplace, not a presented investment or regulated financial-services operation. Although the homepage references data-protection, cookie, and other legal-policy materials, the supplied page evidence does not establish a specific legal-entity name or regulatory registration; this is a limited disclosure note rather than evidence of deception. No adverse broker association was identified, and the absence of such a match is contextual only—not a licensing determination.

- The homepage describes a transaction-based marketplace involving customers and professional refurbishers, with ancillary insurance and instalment-payment offerings.
- The cookie interface provides consent controls, rejection and preference options, and references to cookie and data-protection policies.
- The site's transport encryption uses a YE2-issued domain-validated certificate, valid to 2026-10-15.
- Hosting telemetry confirms service from AS13335 (CLOUDFLARENET — Cloudflare, Inc., US).

What to Verify Next

For procurement, partnership, or material commercial exposure, the contracting entity should be matched against the applicable terms, invoice, and corporate registry record. The provider and governing terms for ancillary insurance or financing should also be confirmed before those optional services are used. Product-level decisions should account for the named refurbisher, condition grade, warranty coverage, return terms, and payment schedule.

- The homepage advertises a two-year warranty and a 30-day trial period, providing concrete terms to reconcile against checkout documentation.
- Listings expose product pricing, customer ratings, and cart actions, enabling transaction details to be checked before purchase.
- The marketplace model places professional refurbishers within the fulfilment chain, making seller-specific identity and condition information relevant to individual orders.
- The site provides support resources alongside trade-in, repair, insurance, and instalment-payment pathways.

Summary Verdict

The website presents as a legitimate, established, and trustworthy e-commerce operation. Its coherent commercial identity, sustained provenance, clean threat reputation, mature customer journey, and consistent technical behaviour support normal interaction, including account login and standard transactions.

Infrastructure Integrity

The site is protected by Cloudflare’s CDN and WAF, with all four observed IPv4 and IPv6 addresses operating as AS13335 edge nodes; the underlying origin was consequently shielded from direct observation. This is a standard exposure-reduction measure and a useful security mitigation, although protective infrastructure is not independently proof of business legitimacy.

Closing Assessment

Prospective customers may use the site normally, applying ordinary e-commerce care when reviewing seller-specific terms and completing purchases.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of backmarket.es.

- The request stayed on backmarket.es. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2016-01-28. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about backmarket.es at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
