

Is bacsituvan24h.com a scam? TrustSniffer's high-risk assessment: 0/100

bacsituvan24h.com

Verdict

0

OUT OF 100

CRITICAL RISK

bacsituvan24h.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Site promotes free adult video streaming and downloads across many categories in Turkish. Claims high-quality playback, anonymity, and no payment requirements. Contact email uses an unusual domain; site appears content-focused rather than financial.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

What bacsituvan24h.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2020.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

bacsituvan24h.com presents a Turkish-language adult-content portal branded “Doeda,” offering free video streaming and downloads across multiple categories. The site promotes high-definition playback, a large content library, anonymity, and access without payment or membership, with an apparent advertising- and tracking-supported business model.

Scam/Impersonation Risk

The site presents a **critical interaction risk** because external reputation checks recorded malicious detections and a confirmed blacklist condition. This is a direct contradiction to treating the domain as a routine content service, although the available evidence does not establish brand impersonation or a login-based phishing workflow. The homepage also contains claims about secure, anonymous, continuously available service that are not supported by a verifiable operator identity or equivalent evidence. The absence of a login form, sensitive submission form, or wallet connection reduces exposure to certain immediate credential and payment-harvesting mechanisms, but it does not offset the confirmed reputation concerns.

EVIDENCE

- External reputation assessment recorded 4 malicious detections and 1 suspicious detection, with the domain confirmed on a blacklist.
- The homepage contains the claims of anonymity, uninterrupted availability, and secure service, while the available site presentation does not substantiate those claims with an identifiable operator.
- Domain registration records show registration on 2024-05-31, with an age of 2.22 years.
- Behavioral inspection of the homepage found no login form, hidden form, password submission destination, wallet connection, or clipboard-hijacking activity.

Regulatory Verification Notes

The site's available legal and identity presentation does not provide a verifiable corporate operator or a claimed and verified license. For an adult-content distribution service, the absence of clear ownership, content-rights information, privacy terms, and jurisdictional disclosures creates material transparency and compliance questions, particularly around copyright authorization, age-related safeguards, and data handling. These are verification gaps rather than independent proof of a scam, but the gaps are significant in combination with the external reputation findings. The domain uses a valid domain-validated TLS certificate issued by WE1; that protects transport encryption but does not authenticate the real-world operator.

EVIDENCE

- The site's business-model assessment identifies an unverifiable contact or address signal and claim-evidence dissonance on the homepage.
- No license is claimed, no licensing authority is identified, and no license number is verified in the available site information.
- The homepage is classified as adult-content streaming and download material, with advertising and possible tracking identified as the apparent monetization model.
- The site's TLS certificate is issued by WE1, uses DV validation, and is valid to 2026-10-11.

What to Verify Next

Before any sensitive interaction, independently establish the operator's legal name, corporate registration, jurisdiction, and authority to distribute the offered material. Confirm applicable content-rights and age-safeguarding arrangements through documentary evidence rather than relying on homepage statements. Any later request for credentials, payment, software installation, or additional personal information should be validated through an independently sourced contact channel and assessed separately from the site's own claims.

EVIDENCE

- Identity verification remains unconfirmed, so operator details should be matched against an authoritative corporate registry.
- The available presentation does not identify a licensing authority or registration number, requiring an external licensing and rights check.
- The homepage's stated service assurances should be compared with independently verifiable privacy, safety, and content-rights documentation.

Summary Verdict

The overall posture is critical and unsuitable for sensitive interaction. The site may provide the content it advertises, but the combination of confirmed external reputation contradictions, unverified operator identity, and substantive disclosure gaps prevents it from being treated as a trusted service.

Infrastructure Integrity

The website is served through Cloudflare's CDN/WAF infrastructure, with observed traffic terminating at CDN edge servers rather than an independently observable origin. This provides a meaningful layer of network protection and reduces direct origin exposure, but it is only a mitigating infrastructure characteristic and does not validate the website's operator or reputation.

EVIDENCE

- Hosting infrastructure: AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- Observed edge IPs include 104.21.58.158, 172.67.161.139, 2606:4700:3033::6815:3a9e, and 2606:4700:3034::ac43:a18b; likely origin IP count was 0.

Closing Assessment

Enterprise users should restrict activity to non-sensitive observation and should not provide credentials, financial information, or additional personal data to this site. Any business, rights, or content-distribution engagement should proceed only after independent identity, authorization, and compliance checks are completed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- Most of what the page loaded came from other domains rather than from this one.

Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bacsituvan24h.com.

- The request stayed on bacsituvan24h.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under GoDaddy.com, LLC. [CLEAR](#)
- DNS for this domain is served by cloudflare.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-05-31. [NOTED](#)
- The earliest public archive of this site is from 2020-08-12. [CLEAR](#)
- It is hosted on CLOUDFLARENET, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bacsituvan24h.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
