

Is baikuder.com safe? TrustSniffer's low-trust assessment: 25/100

baikuder.com

Verdict

25

OUT OF 100

LOW TRUST

baikuder.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 55%.

What this site appears to be

Baikuder homepage presenting office-supply product categories and manufacturer claims. Content emphasizes direct manufacturing, product lines (desk organizers, filing & storage, writing supplies), and company mission. Standard ecommerce landing page with cookie consent controls.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What baikuder.com served when TrustSniffer captured it on 2026-08-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Baikuder is an ecommerce storefront presenting itself as a direct manufacturer and retailer of office supplies and desk accessories, including desk organizers, filing and storage products, writing supplies, and multifunctional workplace items. Its homepage promotes product categories, company information, factory production, and direct sales to business and consumer customers.

Scam/Impersonation Risk

The site's commercial presentation is internally coherent and the analyzed pages showed no login form, sensitive form, wallet functionality, cloaking, or explicit brand-impersonation indicators. However, this benign page-level presentation is outweighed by material external threat signals: six evaluated detections classified the domain as malicious, one as suspicious, and the domain was also identified in external blacklist data. Under the available evidence, these are confirmed reputational contradictions rather than merely a missing disclosure, and they create a high risk for credential, payment, or other sensitive interaction. The site's identity remains unverified, so the Baikuder manufacturer claims should be treated as on-site assertions rather than independently established identity.

EVIDENCE

- The homepage presents office-supply categories, manufacturer claims, and product references including CLS-030, CLS-034, CLS-038, and CLS-064.
- The homepage behavior analysis recorded no login form, hidden form, password submission, wallet connection, clipboard manipulation, or cloaking.
- External reputation telemetry recorded 6 malicious and 1 suspicious detections, with the domain also marked by external blacklist data.
- Domain registration records show creation on 2011-09-14 and an age of 14.95 years; historical records identify activity from 2013-10-16 through 2025-07-10 across 13 years of tracked history.

Regulatory Verification Notes

The website appears to operate as an ordinary office-supply ecommerce business rather than presenting a regulated financial service. Its pages describe direct manufacturing and product sales, but the available evidence does not independently verify the legal entity operating the storefront or connect the on-site business claims to a real-world organization. The absence of an identified licensing claim is not, by itself, evidence of fraud for this business model; nevertheless, the unclear disclosure state is a material verification point before commercial engagement. Registration privacy is an administrative limitation, while the separate external threat findings remain the principal reason for the adverse posture.

EVIDENCE

- The homepage, About, Products, News, Contact, and FAQ navigation presents a manufacturer/ecommerce model but does not independently verify the operating legal entity.
- The site describes “986 Items,” “4 Categories,” and “3 Factories,” and states that its items are made directly by the company.
- The site’s transport encryption uses a DV certificate issued by YE1, valid through 2026-10-08.
- Hosting resolves through AS13335, CLOUDFLARENET — Cloudflare, Inc., US.

What to Verify Next

Before any payment, account creation, or disclosure of business information, an organization should independently confirm the seller’s legal identity, physical operating address, purchase terms, returns process, and payment-protection arrangements using records obtained outside the website. Any claimed manufacturer or factory relationship should be validated through independently sourced corporate contact details and trade documentation. Official support and contact channels should also be confirmed through an offline or independently published route, and the domain’s adverse reputation should be reviewed with the organization’s security or fraud team before an exception is considered.

EVIDENCE

- The identity-verification status is unverified, with no independent identity signals recorded.
- The site's stated business model is direct manufacture and ecommerce sale of office supplies and desk accessories.
- The homepage contains no forms requesting credentials or other sensitive information in the analyzed session.
- The available regulatory context records no identified licensing authority or license number for the site.

Summary Verdict

The website has a coherent office-supply storefront and some technically normal characteristics, but the confirmed adverse external detections and blacklist status establish a **low-trust posture**. The available evidence is insufficient to treat the site as a dependable commercial counterparty for sensitive interactions, despite the age of the domain and the ordinary appearance of its pages.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses were CDN edge addresses rather than a directly exposed origin. This reduces direct origin exposure and is a mitigating technical control, but it does not establish the legitimacy of the operator or offset the adverse reputation findings.

Closing Assessment

Sensitive interaction should be withheld unless independent business, payment, and security checks produce satisfactory results and the organization formally accepts the residual risk.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of baikuder.com.

- The request stayed on baikuder.com. It was not redirected to another domain. CLEAR
- Registration is published under Net-Chinese Co., Ltd.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-09-14. NOTED
- The earliest public archive of this site is from 2013-10-16. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about baikuder.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
