

Is bakusai.com legit? TrustSniffer's high-trust assessment: 90/100

bakusai.com

Verdict

90

OUT OF 100

HIGH TRUST

bakusai.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 45%.

What this site appears to be

Japanese regional user forum (爆サイ.com) showing site stats and regional post counts. Main function: local bulletin board with user posts and regional categories.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

bakusai.com is a Japanese regional community forum presenting locally organized bulletin boards, user-generated posts, regional rankings, visitor statistics, and account-login functionality. Its apparent business model is an established informational community service, potentially supported by advertising or premium account features rather than the operation of a financial product.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a consistent community-forum purpose, and the available content contains no phishing indicators, malicious forms, brand-impersonation signals, or other apparent abuse patterns. External reputation checks likewise returned no malicious or suspicious detections, and the domain has a long-established registration history. The site's substantial public usage footprint is consistent with an established service, although it does not independently prove the real-world operator's identity.

EVIDENCE

- The homepage identifies the service as a Japanese local review and bulletin-board community, with regional categories and user-post statistics; no fraud indicators were recorded.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing contradiction identified.
- The domain was registered in 2007 and is approximately 19.16 years old.

Regulatory Verification Notes

The observed service is informational and user-generated rather than a disclosed financial, brokerage, or investment platform, so no financial licensing claim is presented in the supplied homepage content. The available material does not independently establish the legal entity operating the service; this is an identity-verification limitation rather than evidence of deception. Any future premium, advertising, or payment relationship should be assessed against the operator information and commercial terms presented at the point of transaction. The registration uses NETWORK SOLUTIONS, LLC., a concrete administrative signal, while the certificate provides transport encryption but only domain-level validation.

EVIDENCE

- Domain registration lists NETWORK SOLUTIONS, LLC. as registrar.
- The site is served from AS31898, ORACLE-BMC-31898 — Oracle Corporation, US.
- The TLS certificate was issued by YE2, uses DV validation, and is valid until 2026-09-26T17:39:43+00:00.

What to Verify Next

Before credential or payment interactions, independently confirm the operator’s legal identity, review the applicable terms, privacy provisions, and any return or cancellation conditions, and use payment methods with established transaction protections. If a transaction introduces a regulated financial service, confirm the relevant authorization directly with the applicable regulator. Official support and contact channels should be confirmed through an independent route before resolving account or payment disputes.

EVIDENCE

- The captured homepage contains no sensitive input form and no untrusted form destination.
- The observed page is a user-content service with no disclosed crypto, wallet-connect, or financial-product functionality.
- The site’s displayed business model is informational and community-based, with possible advertising or premium features rather than a regulated financial offering.

Summary Verdict

The overall posture is high trust and low risk, and the available evidence is consistent with an established, apparently legitimate website. The classification supports ordinary use, but the real-world operator remains independently unverified, so legitimacy should be regarded as evidence-consistent rather than proven.

Infrastructure Integrity

Hosting telemetry places the site on Oracle Corporation infrastructure in the United States. This provides an identifiable, mainstream hosting context, but hosting arrangements are a mitigating technical signal only and do not independently establish the operator’s identity or legitimacy.

Closing Assessment

Normal browsing and routine account activity are proportionate to the assessed posture; credentials or payments should follow the ordinary independent identity, terms, and payment-protection checks described above.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status

UNVERIFIED

Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bakusai.com.

- The request stayed on bakusai.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under NETWORK SOLUTIONS, LLC.. [CLEAR](#)
- DNS for this domain is served by oraclecloud.net, across 4 name servers. [NOTED](#)
- The registration is paid up to 2036-06-22. [CLEAR](#)
- It is hosted on ORACLE-BMC-31898, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bakusai.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
