

Is balanceprotocolinstitute.com safe? TrustSniffer's moderate-trust assessment: 70/100

balanceprotocolinstitute.com

Verdict

balanceprotocolinstitute.com is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Not Scam

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Promotional landing page for Balance Protocol Institute offering a 12-month clinician preceptorship combining online coursework, mentoring, and in-person training aimed at healthcare professionals wanting to grow clinical skills and business revenue.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://balanceprotocolinstitute.com/>

What balanceprotocolinstitute.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2018.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Balance Protocol Institute is an education-focused website presenting a clinician preceptorship for healthcare professionals, combining online coursework, mentoring, and in-person training with the apparent commercial purpose of supporting clinical-practice development and enrollment-based training services.

Scam/Impersonation Risk

No blacklist, phishing, impersonation, malicious-content, or conflicting-identity indicators were observed. The homepage promotes a 12-month clinician preceptorship covering clinical education, business development, mentoring, and in-person events; this is a conventional education-services model, although claims that participants can halve working hours while doubling income are promotional and should not be treated as guaranteed outcomes. A small number of abuse reports concern the shared hosting IP rather than the website specifically, so they do not establish site-level abuse or impersonation.

EVIDENCE

- The homepage describes Balance Protocol Institute's clinician education and preceptorship offering and contains no recorded fraud red flags.
- Behavioral inspection of the homepage found no login form, hidden sensitive form, wallet connection, clipboard activity, cloaking, or suspicious inline scripts.
- The shared hosting IP, 35.244.153.44, has 4 abuse reports with a confidence score of 11; the reports are attributed to shared Google infrastructure rather than specifically to the site.

Regulatory Verification Notes

The site presents a named educational institution and identifies healthcare professionals as its intended audience, but the available content does not state a licensing authority, accreditation basis, or license number. That is a regulatory and disclosure matter requiring confirmation, not evidence of a scam. The operator's connection to a separately identifiable real-world legal entity remains unverified. Registration privacy through GoDaddy's privacy service is an administrative limitation rather than an identity contradiction. No matching broker warning was identified in the supplied third-party context.

EVIDENCE

- The homepage title identifies "Balance Protocol Institute – Education For Clinical Success," while the visible navigation provides Home, Program, About, Apply, and Free Training pages.
- No license authority or license number is stated in the supplied site content.
- The domain registration record lists GoDaddy.com, LLC, with registrant privacy provided through Domains By Proxy, LLC.

What to Verify Next

Before enrollment or any substantial payment, independently confirm the operating legal entity, the instructors' professional credentials, the status of any claimed educational or professional accreditation, and the applicable cancellation and refund terms. Where the program involves regulated clinical instruction or practice-related claims, confirm the relevant authorization directly with the applicable professional or regulatory body. Contact details and payment instructions should be validated through an independently sourced channel rather than relying solely on information supplied during the application process.

EVIDENCE

- The homepage provides an "Apply" route but no sensitive form was detected in the captured page.
- The site's stated audience is healthcare professionals, making instructor credentials and the regulatory basis of clinical training relevant verification points.
- The available page content is promotional and does not provide a visible license or accreditation reference.

Summary Verdict

The website has a **moderate trust posture** and no observed scam or impersonation contradictions. Its apparent legitimacy is supported by substantive, coherent site content and generally benign technical and

reputational observations, while the real-world operator identity is not independently verified. Verification is therefore appropriate for consequential commercial or professional commitments.

Infrastructure Integrity

The site is hosted on Google Cloud Platform in the United States. Google-hosted infrastructure and the presence of valid transport encryption are mitigating technical indicators, but hosting infrastructure alone does not establish the legitimacy of the operator or the claims made on the site.

EVIDENCE

- Hosted from AS396982, Google Cloud Platform – Google LLC, US.
- TLS certificate issued by YR2 with DV validation, valid to 2026-10-20.
- The infrastructure assessment identified no CDN edge IPs or likely origin candidates.

Closing Assessment

Ordinary browsing is proportionate, but enrollment, payment, or reliance on professional claims should follow the independent identity, credential, accreditation, and contractual checks described above.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by registration and ownership.

01 Governance Risk

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

Signals weighed against the site

- AbuseIPDB: 4 reports on hosting IP 35.244.153.44 (Google LLC, Content Delivery Network), 11% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of balanceprotocolinstitute.com.

- The request stayed on balanceprotocolinstitute.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by siteground.net, across 2 name servers. NOTED
- The registration is paid up to 2028-01-19. CLEAR
- The earliest public archive of this site is from 2018-08-05. CLEAR
- It is hosted on GOOGLE-CLOUD-PLATFORM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about balanceprotocolinstitute.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
