What balcam.com.mx served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website presents itself as BALANCEOS Y ALINEACIONES PARA CAMIONES S.A., a Mexican automotive-service business offering computer-assisted wheel balancing and alignment for trucks, tractors, trailers, dollies, and other heavy vehicles, including on-site service intended to reduce maintenance costs and vehicle downtime.

Scam/Impersonation Risk

The available evidence supports a **highly cautionary assessment for sensitive interaction**. The site's visible content describes an ordinary commercial vehicle-maintenance service and does not present a login form, password-collection form, wallet function, or other direct credential-harvesting mechanism. However, external security detections include a confirmed blacklist presence and multiple malicious classifications for the domain. The associated IP also carries substantial abuse reporting, although the attribution is to shared data-center infrastructure rather than conclusively to this website. Behavioral analysis additionally identified suspicious inline scripts, so the benign appearance of the service pages does not resolve the external contradiction. No separate legal-entity conflict or brand-impersonation finding was identified.

EVIDENCE

- External reputation assessment recorded 5 malicious and 1 suspicious detection among 6 effective detections, with the domain present on blacklists.
- Abuse reporting concerns IP address 74.208.18.132, with 121 reports and a confidence score of 100; attribution is explicitly to shared IONOS infrastructure.
- The homepage contains one contact form, but no login form, hidden form, password-external form, wallet connection, or wallet-drainer activity was observed.
- Behavioral testing identified 2 suspicious inline scripts across 2 successful runs.

Regulatory Verification Notes

The website identifies the business as BALANCEOS Y ALINEACIONES PARA CAMIONES S.A. and describes services for commercial and heavy vehicles, supported by telephone contacts, a physical address, an email address, and a contact form. It claims 26 years of personnel experience and describes professional service and globally ranked equipment, but these are on-site assertions rather than independently verified credentials. The reviewed content does not state a license or registration number; for an automotive maintenance provider, that is a transparency item requiring confirmation rather than standalone evidence of fraud. Independent identity verification remains unresolved. No matching third-party broker signal was identified.

EVIDENCE

- The homepage and service content identify BALANCEOS Y ALINEACIONES PARA CAMIONES S.A. and describe truck, tractor, trailer, dolly, and mobile alignment and balancing services.
- The technical registration record shows registration on 2019-05-02, an age of 7.31 years, expiry on 2027-05-02, registrar AKKY ONLINE SOLUTIONS, S.A. DE C.V., and registrant name “asociadosweb de la Fuente Delgado.”
- Historical coverage is recorded from 2021-11-25 through 2025-03-21, with 0 archive snapshots reported and 5 years tracked; the historical record is therefore incomplete rather than a reliable continuous business history.
- Transport encryption uses a DV certificate issued by YR2, valid through 2026-10-09.

What to Verify Next

Before any payment, service deposit, or submission of business information, the operator should be confirmed through an independently obtained telephone number or physical-business reference rather than relying solely on the website’s contact details. Any applicable Mexican business, tax, commercial, or sector-specific registration should be checked against the relevant official registry, and payment arrangements should provide documentary invoices and recoverable payment protections. The official support and contact channels should also be confirmed through an independent route.

EVIDENCE

- The site provides telephone numbers, a mobile number, an address, and a contact form on its contact-facing content.
- The business model is service-based and involves customer payments for maintenance work and service calls.
- The site's page title is "default | BALANCEO Y ALINEACIONES PARA CAMIONES S.A." and does not provide structured business metadata or a substantive meta description.

Summary Verdict

The overall posture is **low trust with elevated risk for sensitive interaction**. The website has a plausible local-business presentation, but the confirmed external security contradictions and unresolved independent identity verification prevent it from being treated as a dependable basis for credentials, payments, or other sensitive engagement.

Infrastructure Integrity

The site is protected by a CDN/WAF layer, and the observed edge address is associated with IONOS-AS - IONOS SE, DE. The infrastructure resolved to AS8560, while no origin-server address was observable; this provides some exposure mitigation but does not establish the legitimacy of the operator or offset the external reputation findings.

Closing Assessment

Interaction should remain limited to low-risk information gathering until the operator, applicable registrations, service terms, and payment protections have been independently confirmed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page carried inline scripts written in a style TrustSniffer treats as suspicious.
Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS
- A large share of what the page loaded came from other domains.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_MODERATE
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 121 reports on hosting IP 74.208.18.132 (IONOS Inc., Data Center/Web Hosting/Transit), 100% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of balcam.com.mx.

- The request stayed on balcam.com.mx. It was not redirected to another domain. [CLEAR](#)
- Registration is published under AKKY ONLINE SOLUTIONS, S.A. DE C.V.. [CLEAR](#)
- DNS for this domain is served by ui-dns.org, across 4 name servers. [NOTED](#)
- The registration is paid up to 2027-05-02. [NOTED](#)
- The earliest public archive of this site is from 2021-11-25. [CLEAR](#)
- It is hosted on IONOS-AS, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about balcam.com.mx at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
