## Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2018.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

### Overview

BalloonOrdering is a SaaS web application for balloon decorators and small event businesses, presenting tools for creating orders, calculating prices, preparing estimates and invoices, tracking work, managing customer relationships, and coordinating staff. Its apparent business model is subscription- or service-based business software rather than a financial-return or consumer-investment offering.

### Scam/Impersonation Risk

No contradictions were observed across the available site, technical, behavioral, and reputation signals. The homepage presents a coherent small-business software proposition, including order automation, a decor job builder, estimates, invoicing, order tracking, staff coordination, CRM, and lead retrieval. The site does not present a login form, hidden sensitive forms, wallet-connect functionality, cryptocurrency features, or financial-return promises, and no brand-impersonation indicators were identified. The available external checks also contain no malicious or suspicious findings, although coverage is partial.

#### EVIDENCE

- Homepage: Describes “Balloon Ordering” as an application for balloon professionals and lists business-management functions including invoices, estimates, order tracking, CRM, and staff coordination.
- Homepage behavior: Two successful runs showed no cloaking, hidden forms, password-external forms, wallet activity, clipboard manipulation, or suspicious inline scripts.
- Domain registration record: Registered 2013-09-28, with an age of 12.9 years, through GoDaddy.com, LLC.
- Historical capture record: 10 archive snapshots spanning 2018–2025, across 8 years tracked.

#### Regulatory Verification Notes

The available content is consistent with a software provider rather than an entity making a regulated financial or investment offer. The homepage supplies product information, testimonials, and contact details, but the available material does not independently establish the operator’s legal entity or disclose a licensing or registration number. That is a verification and transparency point, not evidence of impersonation or fraud. Registration privacy is an administrative limitation: the domain record identifies GoDaddy.com, LLC as registrar and Domains By Proxy, LLC as the organization associated with the private registration. No third-party broker match was identified.

#### EVIDENCE

- Homepage: Identifies the service as business software for balloon decorators and includes testimonials attributed to named customers and a location.
- Domain registration record: Registrar is GoDaddy.com, LLC; organization is Domains By Proxy, LLC; owner status is private.
- Hosting and transport artifacts: Served from AS31898, ORACLE-BMC-31898 – Oracle Corporation, US; TLS is issued by YR1 using DV validation and is valid to 2026-10-23.
- Homepage content: No license claim or license number is presented in the available site material.

#### What to Verify Next

Before credential or payment interactions, independently confirm the operating entity, subscription terms, cancellation conditions, refund arrangements, and the official support channels. For any business deployment, confirm that invoices, customer records, and staff-access controls are handled in accordance with the organization’s data-protection and payment requirements.

## EVIDENCE

- Pricing page: Confirm the current subscription structure, billing cadence, renewal mechanics, and cancellation process.
- FAQ and terms pages: Review service limitations, data handling, account responsibilities, and refund provisions.
- Contact page: Independently validate the published business contact details through an offline or separately sourced channel.
- Payment flow: Confirm the merchant descriptor and available payment protections before completing a paid transaction.

## Summary Verdict

Available evidence is consistent with an established, apparently legitimate website presenting a low-risk small-business SaaS service. The overall trust posture is high, with no observed scam, phishing, impersonation, or other contradictory indicators; however, the real-world operator identity remains likely rather than independently verified.

## Infrastructure Integrity

The site resolves to one likely origin address on Oracle Corporation infrastructure, AS31898, with no CDN detected. This provides a concrete and stable hosting posture, while the valid DV TLS certificate issued by YR1 supports encrypted transport; infrastructure protections should be treated as mitigating technical signals rather than proof of business legitimacy.

## Closing Assessment

Ordinary business use is proportionate to the assessed posture, subject to independent confirmation of the operator, commercial terms, and payment protections before submitting credentials or payment information.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

## What the analysis found

No rule findings contributed to this verdict.

## Identity verification

|                                  |        |
|----------------------------------|--------|
| Status                           | LIKELY |
| Identity score                   | 76/100 |
| Identity verification confidence | 38%    |

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of balloonordering.com.

- The request stayed on balloonordering.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by websitewelcome.com, across 2 name servers. NOTED
- The registration is paid up to 2026-09-28. NOTED
- The earliest public archive of this site is from 2018-08-06. CLEAR
- It is hosted on ORACLE-BMC-31898, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about balloonordering.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
