

Is bambur.by safe? TrustSniffer's low-trust assessment: 40/100

bambur.by

Verdict

40

OUT OF 100

LOW TRUST

bambur.by is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Site for Vitaliy Bambur, a family psychologist and relationship coach offering consultations, courses and VIP therapy. Includes description of services, diagnostic survey, contact info, office address and legal registration details.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://bambur.by/>

What bambur.by served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This is a personal professional-services website presenting itself as the online presence of Vitaliy Bambur, a family psychologist, relationship mentor and transformational coach. It offers psychological consultations, relationship coaching, courses and VIP therapy, with booking and diagnostic-survey functions supporting a paid-services model.

Scam/Impersonation Risk

Material risk is present despite the site's service-oriented presentation. External threat-intelligence checks record a confirmed blacklist status, including three malicious and one suspicious detection. Four abuse reports also apply to the resolved IP address, although the attribution identifies shared infrastructure rather than the website specifically. The site itself does not show a login form, hidden password form, wallet connection, or detected brand-impersonation pattern; these page-level observations do not offset the confirmed external reputation contradiction. The available evidence therefore supports a high level of caution for credentials, payments, or other sensitive interactions.

EVIDENCE

- The homepage presents a personal psychology and coaching service, with no detected login or password-collection form.
- External reputation checks recorded 3 malicious detections, 1 suspicious detection, and a confirmed blacklist.
- Four abuse reports were associated with IP address 45.155.60.8 and attributed to shared infrastructure.
- Domain registration records show registration on 2017-03-08, with an age of 9.46 years.

Regulatory Verification Notes

The site presents contact, office-address, payment and legal-registration information, which gives the business model identifiable substance; however, the supplied business information does not state a licensing authority or license number, and the operator's real-world identity remains independently unverified. This is a regulatory and disclosure verification gap rather than, by itself, proof of fraud. The domain has a sustained registration and archival presence, but those positive continuity signals do not overcome the external reputation findings.

EVIDENCE

- The legal and contact information pages present office details and legal-registration information but no stated license authority or license number.
- Archival records contain 67 snapshots spanning 2017–2025, covering 9 tracked years.
- Hosting telemetry identifies AS57724, DDOS-GUARD - DDOS-GUARD LTD, RU.
- The site uses a valid DV TLS certificate issued by YR2, valid until 2026-10-19.

What to Verify Next

Before any sensitive interaction, an independent party should confirm the named practitioner and legal-registration details through the relevant professional or government registry, confirm that the intended payment recipient matches the verified business identity, and review cancellation, refund and service-boundary terms. Contact channels should also be confirmed through an independently sourced route rather than relying solely on information supplied by the site.

EVIDENCE

- The homepage directs visitors to book a consultation and complete a diagnostic survey.
- The contact and legal-information pages provide the identity and payment details that require independent confirmation.
- The service pages describe paid consultations, courses and VIP therapy, making recipient and refund verification relevant before payment.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The site appears to offer a coherent personal-services business, but the confirmed blacklist status and unresolved independent-identity verification prevent a reliable trust conclusion for credentials, payments or other consequential use.

Infrastructure Integrity

The site resolves to a single likely origin address without a detected CDN or WAF layer. It is hosted by DDOS-GUARD - DDOS-GUARD LTD, RU, on AS57724, with the direct-origin arrangement providing less intermediary shielding than a mainstream edge-protection deployment; valid TLS protects transport but does not establish operator legitimacy.

Closing Assessment

Interaction should remain limited to passive review until the practitioner, registration, payment recipient and applicable professional authorization have been independently confirmed; credentials and payment details should not be submitted beforehand.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
 - The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
 - The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS

Signals weighed against the site

- AbuseIPDB: 4 reports on hosting IP 45.155.60.8 (Tilda Publishing JSC, Content Delivery Network), 9% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bambur.by.

- The request stayed on bambur.by. It was not redirected to another domain. CLEAR
- Registration is published under Reliable Software, Ltd. CLEAR
- DNS for this domain is served by hoster.by, across 2 name servers. NOTED
- The registration is paid up to 2027-03-08. NOTED
- The earliest public archive of this site is from 2017-03-22. CLEAR
- It is hosted on DDOS-GUARD, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bambur.by at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
