

Is bamfordproduce.com safe? TrustSniffer's low-trust assessment: 40/100

bamfordproduce.com

Verdict

40

OUT OF 100

LOW TRUST

bamfordproduce.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 75%.

What this site appears to be

Bamford Produce is a longstanding Ontario-based produce distributor offering membership-based ordering, product categories (fruits, herbs, organic, fresh cut), sustainability information, delivery region, address and contact details. The page includes an email signup form and company hours.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What bamfordproduce.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2001.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Bamford Produce is an Ontario-based produce distributor presenting wholesale and retail ordering for fruits, herbs, organic products, and fresh-cut produce through a membership-based model, supported by regional delivery, sustainability information, company history, and contact details.

Scam/Impersonation Risk

No brand-impersonation, phishing-form, or material deception indicators were identified in the supplied homepage content, which presents a coherent produce-distribution business rather than a fraudulent financial or cryptocurrency service. However, the domain is **blacklisted** by multiple external reputation sources, including detections classified as malicious and suspicious. This is a material contradiction to the otherwise benign site presentation and warrants a security-forward posture for credentials, payments, or other sensitive interactions. The domain's long registration continuity and sustained archival presence support historical continuity, but they do not neutralize the current reputation warning.

EVIDENCE

- External reputation telemetry recorded 3 malicious detections and 1 suspicious detection for the domain; the domain was also recorded as blacklisted.
- Domain registration telemetry records creation on 1999-01-26T05:00:00Z and an age of 27.59 years.
- Web-archive telemetry records 210 snapshots from 2001-09-28T12:55:09Z through 2026-06-08T05:35:22Z, spanning 26 tracked years.
- The homepage contains no login form, hidden form, wallet connection, or identified brand-impersonation indicator.

Regulatory Verification Notes

The available pages describe a conventional produce-distribution business and provide business-oriented content such as company information, food-safety material, sustainability information, delivery coverage, contact details, and operating hours. The real-world operator remains unverified by the supplied evidence, so the on-page business presentation should not be treated as independent proof of corporate identity. No regulated financial-service licensing claim is indicated; for this apparent business model, the relevant verification priority is confirmation of the operating entity and commercial relationship rather than treating the absence of a financial license as evidence of misconduct.

EVIDENCE

- The homepage is categorized as a corporate/distributor page and includes an “About Us” area, company-history material, delivery information, and contact details.
- The site's transport encryption uses a DV certificate issued by YE2, valid to 2026-11-14T20:02:40+00:00.
- The available content presents membership-based ordering and an email-signup form without a sensitive credential-collection form.

What to Verify Next

Before any account creation, order payment, or disclosure of business information, confirm that the legal entity, physical address, delivery relationship, and contact channels correspond to an independently sourced Ontario business record or established supplier relationship. A separate security review should confirm that the domain's reputation warnings have been investigated and resolved by the responsible organization. Sensitive actions should remain suspended until those checks produce a consistent result.

EVIDENCE

- The homepage provides the business name, address and contact details, delivery region, and company hours as verification points.
- The ordering flow is described as requiring membership, making the membership and payment process appropriate subjects for independent confirmation.
- The site's behavioral assessment recorded no hidden forms, no external password form, and no wallet-sensitive activity.

Summary Verdict

The overall posture is **low trust**, with elevated risk concentrated in sensitive interaction rather than in the apparent produce-distribution content itself. The coherent commercial presentation and long historical continuity are outweighed by confirmed external reputation contradictions, while operator identity remains unverified.

Infrastructure Integrity

The site resolves directly to one likely origin address rather than through an identified CDN, and is hosted on AS47583 operated by AS-HOSTINGER / Hostinger International Limited, with the infrastructure geolocated to GB. The valid DV certificate provides transport encryption, but hosting and TLS controls are mitigating technical characteristics only and do not establish legitimacy or offset the reputation findings.

EVIDENCE

- Hosted on AS47583 (AS-HOSTINGER - Hostinger International Limited, CY); hosting country recorded as GB.
- Infrastructure telemetry identified 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- TLS certificate issuer: YE2; validation level: DV; valid to 2026-11-14T20:02:40+00:00.

Closing Assessment

Prospective users should limit activity to non-sensitive observation until independent identity, business, and reputation checks are satisfactorily completed; credentials and payment information should not be submitted in the interim.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bamfordproduce.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
