No screenshot is retained for this report.

## Key findings

---

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

## Full analysis

---

### Overview

Banco Agrario de Colombia is an apparent national commercial banking website presenting personal and business banking, financing, payment services, customer-support channels, operational notices, and access to digital banking facilities. Its apparent business model is the provision of standard retail and corporate banking services through deposits, lending, fees, and transactional activity.

### Scam/Impersonation Risk

No contradictions were observed. The site content identifies Banco Agrario de Colombia, provides institutional navigation and customer-service pathways, and contains no detected phishing, impersonation, malicious-content, or other page-level red flags. External reputation signals are clean, including no malicious or suspicious detections and no confirmed blacklist indication. The long-established registration and use of the government-associated domain structure further support an evidence-consistent assessment that this is an established, apparently legitimate website, although the real-world operator identity remains independently unverified.

#### EVIDENCE

- The homepage title and institutional content identify “Banco Agrario de Colombia” and provide personal, business, customer-service, and banking-access navigation.
- The domain was registered in 2001 and is approximately 25.64 years old.
- External reputation assessment recorded 0 malicious detections, 0 suspicious detections, and no blacklist hit for the domain.
- The site uses the `gov.co` domain suffix, classified in the supplied analysis as a verified sovereign-trust context.

### Regulatory Verification Notes

The website presents corporate information, contact channels, transparency and public-information access, customer complaints pathways, rates and tariffs, and links to banking services. However, the supplied page content does not present a specific licensing authority or license number; this is a regulatory-disclosure gap rather than evidence of a scam. The available evidence supports an established, apparently legitimate institutional presence, but it does not independently verify the legal entity operating the website or establish a regulatory authorization beyond the site's own presentation.

#### EVIDENCE

- The homepage links to “Quiénes Somos,” “Contáctenos,” “Transparencia y Acceso a la Información Pública,” “Quejas y reclamos,” and “Servicio al cliente.”
- Confirmed hosting telemetry identifies AS8075, Microsoft Corporation, US.
- The site's TLS certificate is issued by Go Daddy Secure Certificate Authority - G2, uses Domain Validation (DV), and is valid through 2026-12-06.
- The page content does not state a license number or licensing authority.

#### What to Verify Next

Before credential or payment activity, an independent source should confirm the institution's official legal identity, applicable banking authorization, and the correct contact channels. The relevant regulator or public institutional registry should be consulted for the authorization check, while the payment-protection and applicable service or return terms should be reviewed before any transaction. External payment destinations linked from the site should be confirmed as expected through an independently obtained official channel.

#### EVIDENCE

- The homepage links to the PSE credit-payment portal and to an external Microsoft Forms survey, creating distinct destinations that should be checked before submission or payment.
- The site provides “Canales de atención,” “Contáctenos,” and “Servicio al cliente” pages that can be compared with independently sourced institutional contact details.
- The homepage includes links to “Tasas y tarifas” and public-information resources relevant to assessing applicable service terms.

#### Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. The assessment does not independently prove the real-world operator's identity, so legitimacy should be understood as strongly supported by convergent site, domain, reputation, and technical evidence rather than as conclusively verified.

#### Infrastructure Integrity

The site is protected by CDN/WAF infrastructure, and the observed edge address is associated with AS8075, Microsoft Corporation. The origin server was not observable in the supplied infrastructure assessment; this protective architecture mitigates direct origin exposure but is not, by itself, proof of legitimacy.

#### Closing Assessment

Ordinary use is proportionate to the available risk assessment, with independent identity, authorization, terms, contact-channel, and payment-protection checks completed before sensitive credentials or funds are committed.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

#### What the analysis found

No rule findings contributed to this verdict.

## Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 55/100     |
| Identity verification confidence | 60%        |

- Identity verified on page

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of [bancoagrario.gov.co](#).

- The request stayed on [bancoagrario.gov.co](#). It was not redirected to another domain. CLEAR
- Registration is published under [www.registrocolombia.co](#). CLEAR
- DNS for this domain is served by [com.co](#), across 2 name servers. NOTED
- The registration is paid up to 2031-01-02. CLEAR
- It is hosted on MICROSOFT-CORP-MSN-AS-BLOCK, from a server in US. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about [bancoagrario.gov.co](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
