- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is Bandai Namco Entertainment's Japanese corporate and product portal, presenting video games, mobile content, major entertainment franchises, live events, merchandise, ecommerce routes, release information, recruitment resources, and corporate disclosures in support of the company's publishing, licensing, and entertainment business.

Scam/Impersonation Risk

No identity contradictions, impersonation indicators, phishing behavior, deceptive financial claims, or sensitive-data harvesting were observed. The homepage consistently presents Bandai Namco Entertainment's corporate identity and established entertainment portfolio, while the long-standing domain and dense, continuous historical record support provenance rather than recent repurposing. External reputation checks also returned no malicious or suspicious classifications, and the site has an established global traffic footprint.

- The homepage identifies itself as the official Bandai Namco Entertainment site and presents coherent product, franchise, corporate, recruitment, and news content.
- The domain was registered in 2015 and is approximately 11.59 years old.
- The domain has 5,000 archive snapshots spanning 2015–2023, representing 9 years of tracked history with no detected suspicious repurposing or semantic drift.
- The homepage contains one site-search form, with no login form, hidden form, sensitive-data form, untrusted submission destination, cloaking, wallet interaction, or clipboard manipulation detected.

Regulatory Verification Notes

The site represents an entertainment developer, publisher, licensor, and merchandise provider rather than a regulated financial or brokerage service, so the absence of financial licensing claims is consistent with its stated business model. Its corporate-information area provides company details, organizational information, business locations, executive messaging, history, statutory notices, group information, sustainability material, policies, and contact resources. Cookie-consent controls and disclosures concerning personalization and advertising tracking provide further evidence of mature consumer-facing governance.

- The corporate-information pages offer a company profile, organization chart, business-location information, corporate history, statutory notices, group information, and a downloadable company guide.
- The homepage provides dedicated privacy, policy, accessibility, sustainability, recruitment, and contact resources.

- The site is served from AS16509 (AMAZON-02 — Amazon.com, Inc., US).
- The site’s transport encryption uses a DV TLS certificate issued by Amazon RSA 2048 M04, valid through 2026-12-13.

What to Verify Next

Before purchases or account-related activity on linked services, the destination should be confirmed as an official product, ecommerce, or game-service property reached through the corporate portal. Transaction-specific terms, refund conditions, age requirements, regional availability, and privacy treatment should be reviewed on the relevant service page because these may differ across games, merchandise stores, and events. Official contact resources can be used for questions concerning an unfamiliar promotion or destination.

- The homepage routes visitors to separate official sites for individual games and services, making destination confirmation relevant at the point of transition.
- Product listings distinguish platforms including PlayStation, Xbox, Nintendo Switch, Steam, iOS, and Android, indicating that service conditions may be platform-specific.
- The portal separately categorizes ecommerce, game-item stores, licensing, live events, merchandise, and network content, each of which may operate under distinct transaction terms.

Summary Verdict

This is a legitimate, established, and trustworthy corporate website with strong convergence across identity, provenance, reputation, content maturity, and safe observed behavior. No contradictory risk signals were found. Normal interaction, including account login and standard use where offered through official services, is appropriate.

Infrastructure Integrity

The website uses AWS CDN/WAF protection. All three observed addresses were Amazon edge servers, and the origin address was not exposed during the assessment; this reduces direct infrastructure exposure but is treated as a protective control rather than independent proof of legitimacy.

Closing Assessment

Prospective users may engage with the site normally, applying routine transaction hygiene when moving from the corporate portal to a separate product or commerce service.

Written analysis generated 2026-08-04 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of bandainamcoent.co.jp.

- The request stayed on bandainamcoent.co.jp. It was not redirected to another domain. CLEAR
- DNS for this domain is served by d-53.info, across 3 name servers. NOTED
- The earliest public archive of this site is from 2015-04-01. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about bandainamcoent.co.jp at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
